

### Expansion for Innovation

GPA GmbH, the parent company of GROB GmbH Antriebstechnik, is investing in the future of electromechanical drive technology. By constructing a new, state-of-the-art production hall at our site in Sinsheim, we're creating the space needed to further develop and launch our innovations – such as the TowerChain.

This patented technology replaces hydraulic systems with an eco-friendly, energy-efficient solution – ideal for use in environmental engineering, stage construction, and many other industries.

### Project goals

- Expansion of production capacities
- Development and testing of new components
- Market launch and further development of the TowerChain
- Strengthening our technological leadership in electromechanical drives
- Securing the site in Sinsheim

This project is **co-funded by the European Union** through the **European Regional Development Fund (ERDF)** and by the **state of Baden-Württemberg** through the **Rural Development Program (ELR)**.
