Introduction

As the U.S. federal-level program dedicated to facilitating and promoting high-impact business investment into the United States, SelectUSA is pleased to welcome you to the Investor Guide. This is intended to be a first-step resource for companies interested in making business investments in the United States.

There are many factors to consider when investing in the United States, and we hope this guide will help answer at least a few of your initial questions on some of the most common topics we address in our day-to-day work at SelectUSA. To provide guidance on these topics, qualified service providers who regularly work with investors have drafted the following chapters of this guide.

Important considerations while reading this guide:

The size of the United States

The United States is made up of 50 states, five territories, and the District of Columbia – each with their own unique opportunities for investors. While reading this guide, it is important to appreciate the diverse array of potential investment locations while recognizing how that variety may differently impact each state and city. While this may seem daunting, it means that the right U.S. investment landscape is there for your business.

Our nation is incredibly diverse, with the world's most attractive consumer market, a thriving culture of innovation, and one of the most productive workforces in the world. Companies of all sizes – from start-ups to multinationals – find the ideas, resources, and market they need to be competitive. As a result, the United States is the world's number-one destination for foreign direct investment, and we hope you will select it as the destination for your next investment as well.
Levels of governance: federal, state, and local

The United States is governed at different levels, from the federal government down to the state, county, and local levels. Many of the topics discussed in this guide are affected by national laws and by regulations at the state, county, or city level. It is important to remember that much of the information in this guide is presented at the national level, but that specific details may change based on location – especially for some of the most granular subjects that govern your day-to-day business.

This is just one of the reasons why we suggest that any company engage legal counsel and conduct further research, as applicable, to ensure compliance with applicable federal and state regulations and to optimize its business operations in the United States. These topics are often very technical and challenging, but there are many qualified professionals who can help your business make the right decisions.

SelectUSA is here to help you!

This guide is intended as a starting point for your business investment in the United States, and we expect that you will have questions remaining after you finish reading the guide. SelectUSA is happy to help you continue to pursue your investment with our variety of free services for firms, which include:

- Information on the competitive and regulatory landscape in the United States, industry and workforce data, and how to establish and operate a business in the United States.
- Information on federal business incentives, grants, loan and other programs.
- Introductions to economic development organizations.
- Ombudsman services to help investors address issues involving federal rules, regulations, programs, or activities related to existing, pending, and potential investments.

In addition, our website, SelectUSA.gov, provides a wealth of information on our services, as well as other information related to foreign direct investment in the United States. It also contains contact information so we can discuss how we can best help you!

We hope this guide will be a useful first step to explore business investment in the United States.

Overall Investment Checklist

Key Considerations for Foreign Investors in the United States

Robert Calafell, National Credits & Incentives Leader

Matt Dollard, Global Expansion Advisory Leader

Goran Lukic, Director
The United States business market is competitive. It generally allows for a relatively short period to establish new business operations. However, it is important to be mindful of the regulatory environment when setting up a company in the United States. This checklist is designed to provide an efficient and concise summary of the key issues and considerations when investing in the United States. Your U.S. advisors should be able to elaborate on many of the issues listed below.

**Key Questions for Establishing Your Business in the United States**

**What is your strategy?**

Because the United States market is large, doing your due diligence before entering will significantly enhance your success. The temptation for many businesses is to execute first, then plan later. Instead, you should, as the saying goes, plan your work, then work your plan. In other words, start by creating a plan that includes input from a steering team of leaders from across your organization. Set to deliver that plan but remain open-minded and flexible about new opportunities. The ability to adapt to changing or unforeseen circumstances will help your business prosper.

**What are your goals?**

Leading practices of successful United States market entrants demand you begin by defining your business goals and aspirations. Specifically, what financial and non-financial objectives do you care about? What do you aim to become to your customers? What do you want your brand to represent? What type of relationships do you want with suppliers or partners? What do you want the new venture to mean to your employees? Writing down brief, specific, measurable goals around these topics builds alignment and consensus among the team, allowing them to communicate clear intentions throughout your organization.

**Where will you focus?**

Most businesses are unable to master the enormous, complex U.S. market within their first year. Therefore, it is crucial to prioritize where the business spends its precious time and resources. Where are your most profitable current or future customers going to come from? Which markets represent the greatest opportunity? Where will you segment by customer, geography, product, or channel? Define this with specificity; do your research and put realistic figures to it; and then allocate the vast majority of your resources to the top tier of opportunities.

**How will your product or service succeed?**

Taking your product or service to a new market requires you to be an open-minded skeptic about its prospects in a new country. What is your unique selling proposition? Will you
compete on speed, agility, service, cost, quality, or innovation? Have you talked to your current and future customers to understand what they like and do not like about your product or service? What sources of defensible advantages do you have? Will you need partnerships with other businesses to succeed? What is your target business model, and should it differ from your home market, or be localized in some way to succeed? Answering these questions informs how best to organize your new business operations.

**How will you configure business operations to meet your goals?**

Once you have decided what your business must look like, evaluate the capabilities it must have to meet the goals that your steering team developed. If you sell products, where do you need to transform or develop your supply networks? What technological systems must be put in place? What type of skill sets will you need? How will you attract, hire, and retain the talent to grow your business? What must you have in place to meet customer expectations? Getting to these answers is iterative and is informed by the aforementioned work of goal setting, determining where you will establish, and what and how you will offer your product or service.

**What is your plan?**

In your plan, identify key work streams, break them down into tasks, set start and end dates, assign owners, and do research to identify the requisite budget. Make a business case that shows initial cost, payback period, return on investment, and cash flow over time. Evaluate if you have the right people on your team and if they have the bandwidth to execute; then build a hiring strategy into your plan. Your strategic execution plan does not assume you have learned everything you need to know during your earlier discovery work. Instead, your plan is an iterative set of activities that builds your knowledge, which, in turn, illuminates what actions you should take.

Take the time to develop your strategy before you begin the investor checklist.
Key Considerations for Investing in the United States

Investment Planning

Proper planning is critical to the successful establishment of business operations in the United States. This can include market and customer analysis, trade and tariff issues, as well as development of expansion and growth financial models and projections. The early inclusion of advisors can expedite and streamline the expansion.

Your U.S. professional services team can include:

- An international tax professional for the most effective structure for the foreign parent company/owners
- A U.S. tax professional to analyze U.S. federal and state tax issues
- A corporate lawyer to incorporate the entity and draft legal contracts and agreements
- An insurance professional to obtain business liability and workers’ compensation coverage
- A banker for financing and banking needs
- A trade and tariff advisor
- A location selection consultant
- A real estate professional
- A visa attorney

Investment Strategy Development

Developing a data-driven strategy that aligns with the needs of the business and company stakeholders – and is adaptable to change as the business grows – can focus activity toward agreed-upon benchmarks, targets, and results. It is also important that the top tier of the organization be responsible for setting these strategies. Determine the key questions that must be answered and tactics that must be developed. Consider hiring advisors to conduct rapid research to develop the strategy. An efficient strategic development process should not require more than eight to 12 weeks for most startup projects.

Site Selection

Location will affect many components of your business, not to mention its overall success. Choosing where to establish should be a multi-faceted process. Consider the following steps and questions:

- **Goal setting**: What factors drive your company’s success? Apply those you laid out in the planning stage. Consider how important it is for you to be close to your customers.
• **Labor analysis**: How important is gaining access to specific skill sets (labor and talent), and what is the competition, cost, and availability of the required skill sets?

• **Supply chain analysis**: How far can you be from your sources of supply?

• **Location cost analysis**: Narrow a preliminary list to a smaller one and study the best options in further detail. Build a business case to evaluate the cost models utilizing the data you have collected on multiple sites, and weigh the financial and non-financial factors.

• **Credits and incentives**: Evaluate credits and incentives of your investment options. Build these into your business and cost model.

• **Site visits**: Visit a few location options for a first-person analysis of the area and space.

**Tax and Entity Planning**

Determine the type of legal entity best suited to your unique situation, and determine the date of your accounting year-end.

**Note**: A business corporation is the most common entity type for foreign investors, but other possibilities exist, such as limited liability companies, partnerships, and unincorporated branches. The selection of entity type and the accounting year-end should be made with the advice of your U.S. tax accountant and corporate lawyer, and as well as your home country advisors.

Select the jurisdiction where you will establish your business entity. A company may register in any state.

**Note**: Your business entity will be governed by the laws of the state where it is established. Choice of jurisdiction should be made with the advice of your tax professional and corporate lawyer.

Submit paperwork to establish your legal entity. Use an expedited service if needed.
Note: You may pay filing fees and franchise taxes as applicable in the state of registration. These may often total more than $500. You will may also need to name or appoint a registered agent located in the state in which the entity is formed.

- Capitalize the new entity. State law determines the minimum paid-in capital requirement. A common minimum is $1,000.
- Register with the Internal Revenue Service (IRS) for a Federal Employer Identification Number (FEIN).
- File with the state government for a certificate of assumed name or doing business as (DBA) name, if needed.
- Obtain any appropriate state tax and/or local identification numbers.

Discuss federal, state and local tax issues with your advisor.

- Prepare for U.S. income tax compliance. Operations will likely be subject to U.S. income tax. Withholding requirements may apply to payments to the foreign parent.
- Assess whether the foreign parent company has had a U.S. income tax presence ("permanent establishment" in the United States) and if there may be delinquent U.S. tax and/or U.S. tax reporting that need to be addressed.
- Consider a capital investment strategy.
- Review anticipated intercompany transactions to determine potential withholding tax and transfer pricing considerations.
- Identify state and local credits and incentives that may be available.

Plan for state and local tax compliance.

Note: Do not overlook state and local taxes. There are important, complex, and significant variations between each jurisdiction. State and local taxes generally are not covered under international tax treaties. Common state and local taxes include property tax, sales/use tax, payroll taxes, and income tax.

- Prepare for employment taxes and contributions. You need to determine the cost and impact of employment taxes and contributions required by state, local and federal law.

Human Resource Planning
Employers must comply with state and federal laws and regulations controlling the hiring, treatment, compensation, and termination of employees. The following considerations and steps should help you ensure compliance and a productive workforce.

Social Security in the United States does not provide health or similar benefits to employees. Instead, it is a retirement income and health benefits program for the elderly and disabled. It is funded by mandatory employer and employee contributions.

Consulting with your professional services team will help you understand the potential impact for your organization of the Affordable Care Act (ACA), the comprehensive health care reform law that passed in 2010. Understand the necessary proactive steps to comply with ACA regulations. Also, ensure proper visas are secured for non-U.S. employees. Be sure to address the family needs of those employees.

**Accounting and Financial Reporting**

Select an accounting system or provider that is scalable and can grow with your business. The utilization of virtual solutions can be an economical choice for many.

- Select an accounting system and outsource to a provider, if needed.
- Set up your accounting system and financial reporting.
- Address banking, Bankers Automated Clearing Services (BACS), and credit card setup.
- Develop invoicing and bill-pay processing procedures.

Determine the nature and frequency of financial reporting to the parent company, including monthly close and reconciliation processes. (Note: There is no mandatory chart of accounts in the United States.)

Determine whether the parent company needs an audit or other attest procedures in the United States. (Note: There is no statutory audit requirement for private companies.)

**Facility Considerations**

Work with identified real estate and facility providers to secure needed space. Utilization of a shared space, such as a co-working location, is not an uncommon solution for initial operations. As operations grow, a lease or more permanent location can be secured.
• Evaluate facility options in conjunction with your real estate advisor.

• Apply for required state or local business licenses or permits.

• Consult with an insurance advisor regarding any potential employers’ liability insurance that may be required.

• Determine the technology and IT needs for the location once acquired.

About RSM

RSM’s foreign direct investment (FDI) team helps bring your worlds together via our bicultural, bi-technical professionals who are experienced advising foreign-owned companies understand conducting business in the U.S.

RSM advises companies developing operations in the United States, providing informed multidisciplinary guidance to FDIs investing and building operations in new markets, including:

- Planning needs
- Ongoing operations and exit needs
- Remote selling needs
- Initial entry needs
- Navigating and negotiating local and state credits and incentives
- Maximizing complex international for tax and cash flow efficiencies, as well as, domestic tax structuring and compliance
- Outsourcing services including global finance, accounting, and reporting functions

When information about the United States is critical to your success, RSM FDI team possess the extensive local knowledge and experience to be your guide. RSM professionals leverage their multilingual language skills, and business and cultural understanding to provide audit, tax and consulting services to middle market companies focused on international growth and expansion. Learn more by visiting rsmus.com/international.

Immigration

Section One
Visa Overview

A.J. Francis, Interagency Program Manager

Section Two
U.S. Immigration Pathways: Which is Right for Your Investment Project?

Andrew Greenfield, Partner
Section One: Visa Overview

Most foreign citizens need to obtain a visa in order to visit or work in the United States. The U.S. Department of State, in conjunction with the Department of Homeland Security, oversees the U.S. visa process. The purpose of your intended travel and other facts will determine what type of visa is required under U.S. immigration law. Below is a description of the visa types available for business and employment purposes. For information on the U.S. visa process, including updates to visa policy, please refer to the Department of State's travel website.

A visa does not guarantee entry into the United States, but allows a foreign citizen coming from abroad to travel to a United States port of entry (generally an airport or land border) and request permission to enter the United States. The Department of Homeland Security, U.S. Customs and Border Protection (CBP) officials have authority to permit or deny admission to the United States, as well as determine how long a traveler may stay. For more information about admission to the United States, please refer to the CBP website.

Temporary Business Visitor Visas

The **B-1 visa** is generally for foreign nationals who wish to consult with business associates, negotiate a contract, settle an estate, or attend an educational, professional, or business convention or conference. For more information on the B-1 visa and the application process, please visit the Department of State's travel website.

Temporary Worker Visas (Nonimmigrant)

E-2: Treaty Investors

The **E-2 visa** is for foreign nationals who have invested or are actively in the process of investing a substantial amount of capital in a bona fide enterprise in the United States and are seeking to enter the United States solely to develop and direct the investment enterprise. This visa is available to citizens of all countries that maintain the relevant treaty with the United States or have been accorded such status by the enactment of legislation. Additional information on the E-2 visa can be found on the U.S. Citizenship and Immigration Services (USCIS) website.

L-1A and L-1B: Intracompany Transferees
The **L visa** category is a temporary work visa for employees transferred from abroad to a branch, parent, affiliate, or subsidiary in the United States. The **L-1A** visa is for intracompany transferees who will work in a managerial or executive position in the United States. The **L-1B** visa is for intracompany transferees who will work in a position that requires specialized knowledge in the United States. Additional details on the requirements for L-1A and L-1B visas as well as information on blanket petitions may be found on the [USCIS website](https://www.uscis.gov).

**H-1B: Specialty Occupations**

The **H-1B visa for specialty occupations** applies to applicants who may perform the services of a specialty occupation. Their position is considered a specialty occupation when it meets at least one of the following criteria:

1. A position that requires a minimum of a bachelor's degree or equivalent degree;
2. The degree requirement for the job is common to the industry or the job is so complex that it can be performed only by an individual with a degree;
3. The employer requires a degree or equivalent for the position; or
4. The nature of the duties for the position are so specialized or complex that the knowledge required to perform the duties is usually associated with the attainment of a bachelor's or higher degree.

The holder of an H-1B is permitted to work within the United States for a maximum of three years, with a possible extension of up to six years. Spouses and children (unmarried and under 21 years old) may be eligible to accompany the H-1B holder if they are found eligible for an **H-4 visa**.

Each fiscal year, the United States grants a maximum of 65,000 H-1B visas. However, applicants employed at an institution of higher education, a nonprofit research organization, or a government research organization are not subject to this limit. Additionally, the first 20,000 petitions filed on behalf of beneficiaries with a master's degree are exempt from this limit.

For additional details on the application process of the H-1B visa, please visit the [USCIS H-1B webpage](https://www.uscis.gov).

**O-1: Individuals with Extraordinary Ability or Achievement**

The **O-1** is a temporary work visa for individuals who possess an extraordinary ability. The **O-1A** is for individuals with extraordinary ability in the sciences, education, business, or athletics. The **O-1B** is for individuals with extraordinary ability in the arts, motion picture, or
television industries. Under an O visa, the applicant may reside in the United States for a maximum of three years, with an opportunity to extend one additional year.

To be eligible for an O-1 visa, the applicant must be coming to the United States on a temporary basis and must demonstrate their extraordinary ability through sustained national or international acclaim. More specifically, for the fields of science, education, business, and athletics, the applicant must show that they have a level of expertise indicating that they are part of a small percentage who has risen to the very top of the field of endeavor. In the arts, motion picture, and TV industries, the applicant must demonstrate distinction in their field. Distinction means a high level of achievement in the field of the arts evidenced by a degree of skill and recognition substantially above that ordinarily encountered to the extent that a person described as prominent is renowned, leading, or well-known in the field of arts.

The O-2 visa is available for individuals who will accompany O-1 visa holders in order to assist them in their work. The O-2 worker must have critical skills and experience with the O-1 carrier that cannot be readily performed by a U.S. worker. Additionally, he or she must be petitioned for in conjunction with the O-1 alien to whom he or she provides support and is not entitled to work separate and apart from the O-1 alien. The O-3 visa is available for individuals who are the spouse or children of carriers of the O-1 or O-2 visas.

For more information on the O visa category, please visit the USCIS webpage on O visas.

Permanent Worker Visas (Employment-Based Immigration)

The EB visa category is for employment-based immigration. The United States issues approximately 140,000 EB visas each year, split into five different types. The EB-1 visa is for applicants who either possess an extraordinary ability, are an outstanding professor or researcher, or are a multinational executive. The EB-2 visa is for applicants who possess an advanced degree or its equivalent or who possess an exceptional ability. The EB-3 visa is designated for applicants who are skilled workers or professionals. The EB-4 is for specified sets of immigrants, including religious workers, Afghan and Iraqi translators, broadcasters, and others. The EB-5 visa is reserved for candidates who intend on investing a minimum amount of capital that will create a minimum number of jobs in the United States.

For further information on any employment-based visa programs, including additional requirements, stipulations for spouses and children, or necessary forms, please visit the USCIS webpage for EB visas.

About SelectUSA

SelectUSA is a U.S. government-wide program housed in the International Trade Administration at the United States Department of Commerce. Our mission is to facilitate
job-creating business investment into the United States and raise awareness of the critical role that economic development plays in the U.S. economy.

Disclaimer

This chapter was prepared by A.J. Francis with SelectUSA. Views expressed in this chapter are the author's own, not that of the International Trade Administration. This chapter does not constitute legal advice. Readers interested in investing in the United States should consult legal counsel.
Section Two: U.S. Immigration Pathways: Which One is Right for Your Investment Project?

In an environment of fluid markets and changing policies, understanding the immigration options available to investors and their workforces is an essential – but sometimes overlooked – aspect of investing in the United States. Investors need to make sure that their employees have the correct U.S. visa(s) and an immigration advisor to ensure the visas are secured as seamlessly as possible. This chapter details the immigration options available to business investors and their prospective U.S. employees, including information on visa requirements, timeframes, and considerations for families.

The table at the end of this chapter summarizes key aspects of each of the visa categories discussed and includes additional hyperlinks to relevant government websites.

Temporary Visitors

The B-1 (business visitor) visa allows individuals to enter the United States temporarily to conduct certain types of business activities on behalf of a foreign entity or investor. Under a B-1 visa, the individual may establish an investment and plan for relocation, including incorporating a business, meeting with business and financial advisors and contracting for their services, opening accounts, securing premises, and searching for housing and schools.

The B-1 visa does not, however, permit employment on behalf of a U.S. business. Thus, if the foreign investor wants to direct, manage, or perform services in the United States for the new U.S. business, then he or she must first obtain a U.S. work permit. This is true even if the investor will be paid for his services by a foreign company.

Once obtained, the B-1 visa will be valid for as little as one month to as long as 10 years depending on the nationality of the visa holder. Some B-1 visas may be used for only one entry into the United States while others may be used for multiple entries, again based on nationality. Officers at the U.S. border decide how long a business visitor may stay for each visit. The officer may grant a stay for the time necessary to conduct the business, but not more than six months. If the business visitor requires additional time in the United States to complete his or her business activities, then it is possible to request an extension of stay.
from the government, but extension requests will only be granted if the government is convinced that the visitor will not engage in unauthorized employment.

An alternative to the B-1 visa is the Visa Waiver Program (VWP), under which citizens of designated countries can apply to enter the United States as business visitors for 90 days or less without the need to obtain a visa from a U.S. consulate. VWP travelers are required to obtain an online pre-approval from the Department of Homeland Security’s Electronic System for Travel Authorization (ESTA) at least 72 hours before departing for the United States. Those who enter the United States under the VWP may only engage in activities that are permissible for those who enter with a B-1 visa. The law does not permit VWP travelers to extend their stay beyond 90 days.

Family members of the investor may also apply for B-1 visas or travel under the VWP, provided they, like the investor, will not be employed in the United States and intend to return to their home country after a temporary visit. The B-1 visa and VWP may not be used for the purpose of attending school in the United States.

**Treaty Traders and Investors**

The E-1 (Treaty Trader) and E-2 (Treaty Investor) visa categories allow individuals to enter the United States to work for a U.S. business that is majority owned by citizens of a country with which the United States has a commercial treaty. The E visa applicant must be a citizen of the treaty country who will direct and manage the U.S. business or provide essential skills. Generally, “E-1 treaties” require the U.S. business to engage in substantial trade with the other treaty signatory. “E-2 treaties” require a substantial investment in the U.S. business. The United States has treaty relationships with many major economies. There is no such treaty with India or China.

Qualifying U.S. businesses must apply for and be deemed eligible by a U.S. consulate in order to support E visa applications. This process can be complex. Once the business is deemed eligible, qualified citizens of the treaty country may apply for E visas at a U.S. consulate. These may be the principal investor(s) in the U.S. business or other citizens of the treaty country whose skills and experience are required by the U.S. business.

There is no maximum number of years an individual may be employed in the United States as an E treaty trader or investor, so long as they continue to provide management or essential skills services to the U.S. treaty business and the business remains at least 50 percent owned by citizens of the treaty country. Spouses and unmarried children under age 21 may accompany the principal E visa holder and attend school. Spouses of principal E visa holders can apply for authorization to work in the United States for any employer without the need for separate sponsorship.
Note: there is no requirement that the E visa applicant be employed outside the United States by a foreign parent or affiliated company prior to his or her U.S. assignment. This is an important distinction from the L-1 visa category discussed below.

**Intracompany Transferees**

The L-1 visa category is for foreign nationals who will be assigned to work in the United States for an organization that is related to their home country employer. Employees who have worked outside the United States for at least one continuous year in an executive, managerial, or specialized knowledge capacity for a parent, branch, subsidiary, or other affiliate of the U.S. employer may be eligible for L-1 classification. The employer must seek to transfer the employee to the United States to assume an executive, managerial, or specialized knowledge position, although it does not need to be the very same position the employee held abroad. Newly established U.S. businesses may sponsor foreign employees for L-1 visas, but work authorization is initially granted for one year, and the employer must subsequently renew sponsorship with evidence of business viability.

Ordinarily, the employer must obtain U.S. Citizenship and Immigration Services (USCIS) approval for each prospective L-1 transferee before the transferee can apply for an L-1 visa at a U.S. consulate. However, there is a streamlined process, known as the L-1 “blanket program,” that does not require USCIS processing and permits the U.S. consulate to handle the entire adjudication process. The blanket program is available for large multinational organizations who frequently transfer employees to the United States. To qualify for the blanket program, the U.S. employer must have been doing business in the United States for at least one year and meet at least one of the following criteria: 1) at least ten L-1 approvals from USCIS in the prior year; 2) U.S. sales of at least $25 million; or 3) at least 1,000 U.S. employees. USCIS processing for individual L-1 filings and/or initial approval for the corporate blanket program can take several months unless the employer pays for 15-day Premium Processing. Once the initial corporate blanket petition is approved by USCIS, individual L-1 visa requests may be made entirely at the consulate, as stated above.

L-1 work authorization is available for up to seven years if the U.S. role is executive or managerial (L-1A) or up to five years if the U.S. role requires specialized knowledge (L-1B). L-1A executives or managers who also served as executives or managers for their foreign affiliated employers before transferring to the United States may be eligible to apply for U.S. permanent residency (the “green card”) without the need for the U.S. labor market test that is typically a prerequisite for green card applications.
Spouses and unmarried children under age 21 may accompany the principal L-1 visa holder and attend school in the United States. Spouses of principal L-1 foreign nationals can apply for authorization to work in the United States for any employer without the need for separate sponsorship.

Note: unlike the E-1 and E-2 visa categories discussed above, the L-1 visa is available to those of any nationality so long as they have been employed abroad by an affiliated company for at least one year in a qualifying capacity.

**Specialty Occupation Professionals**

The **H-1B** visa category is available to persons who will be employed in “specialty occupations.” Specialty occupations are defined by USCIS as occupations for which a bachelor’s degree or equivalent in a specific academic field of study is required to perform the job. The H-1B candidate must in turn possess at least a bachelor’s degree, or equivalent education and/or experience, in the specified field of study.

The H-1B visa is one of the most sought-after U.S. employment visas, but it presents two key challenges for employers. Unlike other temporary U.S. work visas, the H-1B visa category is subject to an annual quota of 65,000, plus an additional 20,000 quota numbers for those holding a U.S. advanced degree. Each year, the demand for H-1B visas far exceeds the quota. This restricts the H-1B option for most of the year. Quota exemptions are available for certain nonprofits and existing H-1B visa holders, who may change employers during their H-1B tenure in the United States, subject to successful sponsorship by a subsequent employer sponsor.

The H-1B visa program is also regulated by the U.S. Department of Labor (DOL), which requires employers to obtain approval of a “Labor Condition Application” (LCA) before filing an H-1B petition with USCIS. Among other things, the LCA requires employers to attest they will pay the H-1B worker competitive wages and provide notice to local U.S. employees of the H-1B sponsorship. DOL may investigate employers’ compliance with LCA attestations and violators may be subject to significant monetary penalties and debarment from the H-1B and other immigration programs.

The employer must have USCIS approval before the H-1B candidate can apply for an H-1B visa at a U.S. consulate. USCIS processing is several months unless the employer pays for two-week Premium Processing.
H-1B employment authorization is available for up to six years and may be granted in up to three-year increments. Extensions beyond six years may be permitted where the worker is sponsored for U.S. permanent residency.

Spouses and unmarried children under age 21 may accompany the principal H-1B visa holder to the United States and attend school. Spouses are not eligible for work authorization as dependents unless the principal H-1B employee is being sponsored for an employment-based green card and is well along in that process.

**Canadian and Mexican Professionals**

The **TN** visa category was created pursuant to the North American Free Trade Agreement (NAFTA) and permits certain Canadian and Mexican citizens to accept temporary employment in the United States. To qualify for TN classification, a U.S. employer must be offering a temporary position in an occupation that is listed in the NAFTA. The listed occupations generally require the individual to possess a bachelor’s degree (or a Canadian or Mexican degree that is equivalent to a U.S. bachelor’s degree) in a field related to the occupation. This type of work authorization is also included in the recently negotiated U.S.-Mexico-Canada Agreement.

Canadians may apply for TN classification at a U.S. border with a sponsorship letter from the U.S. employer and supporting documentation; they are not required to obtain a TN visa stamp at a U.S. consulate as Canadian citizens are generally exempt from the U.S. visa requirement. Citizens of Mexico must apply for a TN visa at a U.S. consulate before proceeding to the United States.

TN employment authorization is granted in up to three-year increments with no limitation on the maximum period of stay. However, an individual in TN status must maintain the intent to remain in the U.S. temporarily.

Spouses and unmarried children under age 21 may accompany the principal TN employee and attend school but are not eligible to work in the United States unless they obtain separate sponsorship.
Persons of Extraordinary Ability

The **O-1 visa** is available to individuals who can demonstrate “extraordinary ability” in the sciences, education, business, athletics, or the arts. USCIS regulations provide that these individuals are among the small percentage who have risen to the very top of their field of endeavor and have achieved national or international recognition for their achievements in their field. In addition to these overarching requirements, O-1 petitions must include evidence, including letters of reference, that meets at least three categories of evidence listed in the regulations.

While the standard for the O-1 visa is high, one does not need to have a Nobel Prize or Olympic medal or be widely known to the public. Rather, evidence must show that the candidate is highly respected and distinguished within his or her specialized sphere of expertise.

Employers must seek USCIS approval before a foreign national can apply for an O-1 visa. USCIS processing takes several months unless the employer pays for 15-day Premium Processing.

O-1 visas are initially granted for three years and then in one-year increments, with no limitation on the maximum period of stay. Spouses and unmarried children under age 21 may accompany the principal O-1 visa holder and attend school but are not eligible to work in the United States unless they obtain separate sponsorship.

**Employment-Based U.S. Residency (the “Green Card”)**

A U.S. employer may sponsor an employee for U.S. residency and in some cases an employee may self-sponsor his or her green card application. In most cases, a residency application sponsored by a U.S. employer requires the DOL to certify that U.S. workers are not available for the sponsored role after the employer completes a U.S. labor market test. The labor market test requirement – known as PERM – requires employers to place ads in newspapers, publicize the job announcement on recruitment sites, and demonstrate that any U.S. applicants were considered for the role in good faith, but none met the employer’s minimum requirements.

Exceptions to the labor market test requirement include foreign nationals who qualify as persons of extraordinary ability, outstanding professors or researchers, multinational executives and managers, those whose work serves the U.S. national interest, and residency applications made through the EB-5 investor program.
Once DOL certifies the employer’s labor market test, or where the labor market test is waived, the employer (or the employee where self-sponsorship is permitted) must file a petition with USCIS seeking classification in one of five employment-based green card categories, often referred to as “EB” categories, i.e., “EB-1” through “EB-5.” Eligibility for the EB-1, EB-2, and EB-3 categories is generally based on the education, experience, and specialized skills required for the sponsored role and possessed by the sponsored employee, among other factors. The EB-4 category comprises a broad range of foreign nationals, including certain religious workers, translators, and retirees of international organizations, each with their own eligibility requirements.

Finally, the EB-5 category is a special type of employment-based green card category designed for investors. To qualify for the EB-5 program, the investor must make an investment of personal funds in a new commercial enterprise or troubled business, either directly or via a government-approved Regional Center. The required investment is US$1.8 million. However, if the business is in a location designated by the U.S. government as a high unemployment area, the required investment decreases to US$900,000.

Once classified in the appropriate green card category, the employee and dependents can complete the green card process by filing an application for residency status in the United States or by filing for an immigrant visa at a U.S. consulate. Because employment-based green cards are limited by an annual quota, some applicants, depending on their classification category and country of birth, may need to wait many years before they can complete the process and become residents. As a result, the entire green card process can take as little as two years (sometimes less) to a decade or longer.

Spouses and unmarried children under age 21 may apply for residency with the principal applicant in order to live, attend school, and work in the United States.

Except for the EB-5 category, once an individual is granted U.S. permanent residency status, he or she and eligible dependents may work for any U.S. employer and live in the United States indefinitely. In the case of EB-5 sponsorship, the investor and dependents are granted U.S. residency initially for two years. If the investment creates or preserves 10 jobs for U.S. workers within two years, then the investor and dependents may apply for indefinite residency.

In order to preserve residency status, a permanent resident must maintain his or her primary residence in the United States and abide by all tax and other laws applicable to U.S. residents.

**Which Option Is Right for Your Organization?**

There is an array of immigration options for foreign investors and their employees. Choosing the right immigration pathway is an important decision that should be made with
competent immigration counsel, preferably at the early planning stages of your U.S. venture.

Please see the attached table, which summarizes the visa categories discussed above and provides additional hyperlinks to government websites.
## Visa Type

<table>
<thead>
<tr>
<th>Visa Type</th>
<th>Permitted Activities</th>
<th>Prohibited Activities</th>
<th>Eligibility Criteria</th>
<th>Length of Stay</th>
<th>Dependents</th>
<th>Process and Timeframe</th>
</tr>
</thead>
<tbody>
<tr>
<td>B-1 Business Visitor</td>
<td>Establish an investment and plan for relocation, including: • Incorporate a business • Open accounts • Secure premises • Search for housing and schools</td>
<td>Must have a residence outside the United States and intend to remain in the United States temporarily and only for permitted activities.</td>
<td>Up to six months with a B-1 visa stamp, or up to 90 days under the Visa Waiver Program with approved ESTA.</td>
<td>Yes, provided they will not engage in prohibited activities and they meet eligibility criteria.</td>
<td>Yes. Spouses and unmarried children under age 21 may accompany principal visa-holder and attend school. Spouses can apply for work authorization.</td>
<td>Immediate if already have B-1 visa; a few days to secure on-line ESTA approval; Appointment waiting times at U.S. consulate to apply for B-1 visa range from days to weeks.</td>
</tr>
<tr>
<td>E Treaty Trader/Investor</td>
<td>Invest in, direct, and/or manage a U.S. business that is majority owned by citizens of a treaty country.</td>
<td>U.S. employment with an organization other than the one sponsoring the E visa business.</td>
<td>Visa validity varies by country. Two-year stay typically granted each entry. No maximum period of stay.</td>
<td>Yes. Spouses and unmarried children under age 21 may accompany principal visa-holder and attend school. Spouses can apply for work authorization.</td>
<td>Qualifying U.S. businesses must request eligibility from U.S. consulate in order to support E visa applications. Once eligible, qualified citizens of treaty country may apply for E visas at U.S. consulate. Appointment waiting times at U.S. consulate to apply for E visa range from days to weeks.</td>
<td>E-1 visas require U.S. business to engage in substantial trade with the other treaty signatory. E-2 visas require a substantial investment in U.S. business.</td>
</tr>
<tr>
<td>L-1 Intracompany Transferee</td>
<td>L-1A: Employment as executive, manager for a U.S. entity with foreign affiliates L-1B: Employment based on specialized knowledge for a U.S. entity with foreign affiliates</td>
<td>U.S. employment other than with sponsoring L-1 organization</td>
<td>Must be employed outside U.S. for at least one year in an executive, managerial, or specialized knowledge capacity for a parent, subsidiary, affiliate, or branch of U.S. entity.</td>
<td>Up to 7 years if U.S. role is executive or managerial (L-1A) Up to 5 years if U.S. role is specialized knowledge (L-1B)</td>
<td>Yes. Spouses and unmarried children under age 21 may accompany the principal visa-holder and attend school. Spouses can apply for work authorization.</td>
<td>USCIS approval required before applying for visa unless employer has an approved “blanket” petition covering the U.S. and foreign employers. USCIS processing is several months unless employer pays for two-week Premium Processing. Appointment</td>
</tr>
</tbody>
</table>

### Special Considerations

- While a stay of up to 6 months is permitted under the rules for those with a visa, U.S. border officers will typically only permit entry for a shorter period, depending on the reasons for the visit. Entrants under the Visa Waiver Program/ESTA will almost always be granted a 90-day stay.

- E-1 visas require U.S. business to engage in substantial trade with the other treaty signatory. E-2 visas require a substantial investment in U.S. business.

- Newly established U.S. businesses may sponsor foreign employees for L-1 visas, but work authorization is initially granted for one year, then sponsorship must be renewed with evidence of continued business viability.

</thead>
<tbody>
<tr>
<td>H-1B Professionals</td>
<td>Employment by U.S. sponsor in a &quot;specialty occupation&quot;.</td>
<td>U.S. employment other than with sponsoring H-1B employer.</td>
<td>The U.S. job must require, and the foreign worker must possess, at least a bachelor's degree or equivalent in a particular and closely related course of study.</td>
<td>Up to six years. Extensions beyond six years may be permitted where worker is sponsored for U.S. residency.</td>
<td>Yes. Spouses and unmarried children under age 21 may accompany the principal visa holder and attend school. Spouses can apply for work authorization in certain circumstances.</td>
<td>USCIS approval required prior to visa application. USCIS processing is several months unless employer pays for two-week Premium Processing. Appointment waiting times at U.S. consulate to apply for H-1B visa range from days to weeks.</td>
<td>An annual quota restricts H-1B option for most of the year. Quota exceptions for certain nonprofits and existing H-1B workers may apply. Regulated by the U.S. Department of Labor, which requires payment of competitive wages and notice of sponsorship to local U.S. employees.</td>
</tr>
<tr>
<td>TN Professionals</td>
<td>Employment by a U.S. sponsor in an occupation specified in NAFTA (not materially changed by USMCA).</td>
<td>U.S. employment other than with sponsoring TN employer.</td>
<td>Citizens of Canada and Mexico. U.S. job must match occupation on NAFTA list. Must have education and/or experience required for occupation by NAFTA, which is typically a bachelor's degree or foreign equivalent degree.</td>
<td>Up to three-year increments. No maximum period of stay. Must have intent to stay in the United States temporarily.</td>
<td>Yes. Spouses and unmarried children under age 21 may accompany the principal visa holder and attend school but may not work as dependents.</td>
<td>Canadians apply at U.S. border with sponsorship letter from U.S. employer and supporting documentation. Citizens of Mexico must apply for a TN visa at U.S. consulate. Appointment waiting times at U.S. consulate to apply for TN visa range from days to weeks.</td>
<td>Dependents do not need to be citizens of Canada or Mexico, but dependents must apply for a visa unless they are citizens of Canada.</td>
</tr>
<tr>
<td>O-1 Persons of Extraordinary Ability</td>
<td>Employment by a U.S. sponsor in a job related to expertise.</td>
<td>U.S. employment other than with the sponsoring O-1 employer.</td>
<td>Individuals who are nationally or internationally renowned and acclaimed for achievements in their field.</td>
<td>Initially for three years, and then in one-year increments. No maximum stay.</td>
<td>Yes. Spouses and unmarried children under age 21 may accompany the principal visa holder and attend school but may not work as dependents.</td>
<td>USCIS approval required prior to visa application. USCIS processing is several months unless employer pays for two-week Premium Processing. Appointment waiting times at U.S. consulate to apply for O-1 visa range from days to weeks.</td>
<td>Substantial evidence required, including letters of reference, as well as other specific evidence required by regulation.</td>

<tr>
<td>U.S. residency (the &quot;green card&quot;), other than the EB-5 Investor Program</td>
<td>Live and work in the U.S. indefinitely. May work for any U.S. employer once residency is granted.</td>
<td>Failure to maintain primary residence in the United States. Violation of tax and other laws applicable to U.S. residents.</td>
<td>A U.S. employer sponsor and labor market test are generally required, unless the labor market test is waived. Employee and sponsored job must also meet requirements for sponsorship category, based on education, experience, and skills.</td>
<td>Indefinite.</td>
<td>Yes. Spouses and unmarried children under age 21 may apply for residency and also live and work in the United States indefinitely.</td>
<td>U.S. Department of Labor approves labor market test, unless waived. File immigrant petition in proper green card category based on education, experience, and skills. Employee and dependents can then file to complete U.S. residency process. One- to two-year processing. Depending on country of birth and sponsorship category, annual quota may delay case by several years.</td>
<td>Labor market test is waived for persons of extraordinary ability, outstanding professors and researchers, certain multinational managers and executives, and those working in the national interest. The EB-5 investor program also does not require a labor market test. See below.</td>
</tr>
<tr>
<td>U.S. residency (the &quot;green card&quot;): the EB-5 Investor Program</td>
<td>Live and work in the U.S. indefinitely.</td>
<td>Failure to maintain primary residence in the United States. Violation of tax and other laws applicable to U.S. residents.</td>
<td>Investment of personal funds in a new commercial enterprise or troubled business. Required investment is US$1.8 million, or US$900,000 where the business is in a designated high-unemployment area.</td>
<td>Residency granted conditionally for 2 years, then indefinitely once certain criteria are met.</td>
<td>Yes. Spouses and unmarried children under age 21 may apply for residency and also live and work in the United States conditionally and then indefinitely.</td>
<td>File petition with USCIS to establish eligibility and apply for residency status, which is granted conditionally for two years. If the investment creates or preserves 10 jobs for U.S. workers within two years, the investor may apply for indefinite residency, subject to an annual quota.</td>
<td>Some EB-5 investments can be made through government-approved Regional Centers that sponsor EB-5 capital investment projects. Investing in a regional center permits showing indirect job creation when applying to remove conditional residency.</td>
</tr>
</tbody>
</table>
Glossary

**Adjustment of Status (AOS):** An option for the final stage of the permanent residence process. The AOS application, Form I-485, can be filed with USCIS if the priority date is current and certain other requirements are met.

**B-1 Business Visitor:** Visa category for business visitors to the United States. The B-1 visa does not confer the ability to work and B-1 visa holders cannot receive compensation from a U.S. source or work on a project where services are being billed to a client. Business visitors from certain countries can enter the United States without a B-1 visa stamp under the Visa Waiver Program (VWP); these individuals are admitted for a maximum of 90 days and are not eligible for extensions of their status except in extremely limited circumstances. B-1 visitors who have visa stamps in their passports can be admitted for up to six months and are eligible for extensions of their status.

**B-2 Tourist Visitor:** Visa category for tourists visiting the United States. Tourists from some countries are able to enter the U.S. without a B-2 visa stamp under the Visa Waiver Program (VWP); these individuals are admitted for a maximum of 90 days and are not eligible for extensions of their status except in extremely limited circumstances. B-2 visitors who have visa stamps in their passports can be admitted for up to six months and are eligible for extensions of their status.

**Department of Labor (DOL):** U.S. federal agency that includes the Office of Foreign Labor Certification, which oversees prevailing wage determinations, Labor Condition Applications (LCAs), and labor certifications/PERM.

**Green Card:** The informal name for the Permanent Resident Card, which is evidence that an individual has been granted status to live and work in the United States indefinitely.

**H-1B:** Visa category for temporary workers engaged in an occupation which requires the theoretical and practical application of a body of highly specialized knowledge and the attainment of a bachelor's or higher degree in the specific field for entry into the occupation. Maximum period of stay is six years, with certain exceptions.

**H-4:** Visa category for spouses and unmarried children under 21 years of age who are accompanying H-1B visa holders. H-4s are not eligible for work authorization except in limited circumstances.

**I-129 Form:** Form I-129, Petition for a Nonimmigrant Worker, is the government form filed by the employer with USCIS to request E, H, L, O, or TN visa classification on behalf of a foreign national.

**I-140 Form:** Form I-140, Immigrant Petition for Alien Worker, is a government form filed by an employer with USCIS in U.S. permanent residency cases. The filing of this form is the
second stage of the permanent residence process for employment-based cases requiring PERM and the first stage where PERM is not required.

**I-485 Form**: Form I-485, Application to Register Permanent Residence or Adjust Status, is the government form filed with USCIS by a foreign national who is in the United States and seeks to finalize the permanent residence process.

**L-1**: Visa category for an Intracompany Transferee. The employee must have worked outside the United States for at least one year for a parent, subsidiary, affiliate or branch office of the U.S. employer in a specialized knowledge (L-1B), or executive or managerial (L-1A) capacity. Individual L-1 petitions are submitted to USCIS in the United States for adjudication and approval before the visa stamp can be issued. This is in contrast to the Blanket L procedure where the application is submitted directly to the U.S. Consulate abroad. Maximum period of stay is five years (L-1B) or seven years (L-1A).

**L-2**: Visa category for spouses and unmarried children under 21 years of age who are accompanying L-1 visa holders. L-2 spouses may apply for work authorization.

**Labor Certification**: A certification by the U.S. Department of Labor (DOL) that there is no able, willing, qualified and available American worker (generally, this means a U.S. citizen or lawful permanent resident) available for a particular position, in a particular geographic area, at a prevailing wage. The labor certification relates to a particular position, not an employee. In order to obtain an approved labor certification, the employer must show that it tested the local job market and made a good faith effort to recruit for the position, and that employment of a foreign national employee does not adversely affect the wages or working conditions of similarly employed U.S. workers.

**Labor Condition Application (LCA)**: The LCA is a prerequisite to filing an E-3, H-1B or H-1B1 petition. In the LCA, the employer attests to certain wage, working conditions, and notice obligations. The LCA must be approved by the U.S. Department of Labor (DOL).

**Lawful Permanent Resident (LPR)**: A person who has been granted authorization to live and work in the United States on an indefinite basis. Also known as an immigrant, green card holder, or permanent resident.

**O-1**: Visa category for a Person of Extraordinary Ability. U.S. employers may sponsor foreign nationals for O-1 employment for an initial period of three years, and then in one-year increments.

**Passport**: Travel and identity document issued to foreign nationals by their country of citizenship. Must be unexpired in order to enter the United States. The U.S. Consulate will place nonimmigrant visa stamps in the foreign national’s passport. The passport must be valid for at least 6 months at the time of entry.
**Program Electronic Review Management (PERM):** The attestation and audit system under which employers obtain permanent labor certification for certain employment-based immigrant cases. Under PERM, employers conduct recruitment and advertising before filing a labor certification application. Applications are submitted electronically or by mail and are subject to audit by Certifying Officers of the Department of Labor.

**Permanent Residence:** A legal status that permits an individual to live and work in the United States indefinitely. When this legal status is granted, the government issues a Permanent Resident Card, often referred to informally as a “green card.”

**Port of Entry (POE):** The port of entry is the air, land or sea port through which the foreign national travels to the United States.

**Priority Date:** The date a U.S. employer files a PERM application with DOL on behalf of a foreign national. Where a PERM application is not required, then the date Form I-140 is filed with USCIS. This date secures a place in the queue for the foreign national under the green card quota system.

**United States Citizenship and Immigration Services (USCIS):** USCIS is the agency that processes applications and petitions for immigration benefits. Formerly known as the Bureau of Citizenship and Immigration Services (BCIS) and the Immigration and Naturalization Service (INS).

**Visa Stamp:** This is the stamp embossed in a foreign national’s passport by a U.S. consulate abroad, which indicates the foreign national's specific visa category. In order to enter the U.S., most foreign nationals must have a currently valid visa stamp in their passport (except Canadian citizens and persons entering in B-1/B-2 status under the visa waiver program). A foreign national who presents a visa stamp to the inspector at the port-of-entry may be admitted in that visa category and be issued an entry/departure record, Form I-94, showing the immigration status and length of time allowed to stay in the U.S.

**Visa Waiver Program (VWP):** The VWP permits citizens of designated countries to apply for admission to the United States for 90 days or less as nonimmigrant visitors for business or tourism without first obtaining a B-1 or B-2 visa stamp from a U.S. Consulate. Visits are generally short-term and, with very limited exceptions, cannot involve employment in the U.S. or the undertaking of an academic study program.
About Fragomen

Fragomen is a leading firm dedicated to immigration services worldwide. The firm has more than 4,400 professionals and staff—including over 500 lawyers and equivalent professionals—in 52 offices located in the Americas, Asia Pacific and EMEA. Each location is established either as a law firm or an immigration consultancy, in accordance with applicable local laws and regulations. In total, Fragomen offers support in more than 170 countries.

Fragomen’s professionals are respected thought leaders in the immigration field, as recognized year after year by Chambers, Best Lawyers and Who’s Who. They contribute to conferences and seminars around the world, and author books and other publications that are relied on as standard references by other immigration professionals. Many of Fragomen’s professionals have prior experience working in government agencies and in-house corporate immigration departments, allowing Fragomen to advance strategies for world-class immigration program management.

Fragomen is structured to support all aspects of global immigration, including strategic planning, efficiency, quality management, compliance, government relations, reporting, and case management and processing. These capabilities allow the firm to represent a broad range of companies, organizations and individuals, working in partnership with clients to facilitate the transfer of employees worldwide. For detailed information about Fragomen, please visit www.fragomen.com.

Business Structure

An Overview of Common Business Structures for Foreign Investors

Anna Jinhua Wang
Jeffrey J. White
J. Michael Wirvin
Michael J. Kearney
Choosing the right type of business structure is a critical first step for foreign persons planning to conduct business in the United States. There are several types of entities available, each with its own unique benefits and limitations. The “right” choice depends on a foreign person’s specific interests and needs. There is no “one-size fits-all” structure. The purpose of this chapter is to provide a high-level comparison of some common business structures used by foreign persons to conduct their U.S. operations and what impact that structure might have on the company’s business and financing opportunities.

I. General Considerations

(1) Citizenship/Residency Requirements

The procedure for a foreign person (be that a foreign entity or foreign individual) to establish and form a business entity in the United States is essentially the same as it is for a U.S. person. U.S. citizenship, permanent residency (also known as a green card), or a work visa are not required in order for foreign persons to be owners of a U.S. business entity, nor are they required in order for a foreign individual to serve on the board of directors of a corporation in the United States. However, it should be noted that simply being an owner, stockholder, board member, or employee of a U.S. business entity does not in itself permit a foreign individual to work in the United States. There are very specific immigration and customs requirements that apply to non-U.S. citizens who wish to work and earn income in the United States. These requirements are not covered in this chapter (please refer to the Immigration Chapter for more information), but they should be investigated fully in connection with any plan by a foreign person to establish a U.S. business operation.

(2) Formation Timing and Disclosure Requirements

Once the appropriate type of entity has been determined, it must be formed. The appropriate jurisdiction of formation is a factor that must be carefully considered. There are 50 states, one federal district, and five territories in the United States. Each has its own rules and regulations regarding business entity formation. The approach of most states has been to make the incorporation or formation process as simple and streamlined as possible. In many cases, an entity can be formed in just a few days, and sometimes even the same day, depending on its complexity and the jurisdiction in which it is being established.
The information required by most states to be disclosed publicly by a company in its formation documents is quite limited and will generally include: (i) the name of the company, (ii) the names and addresses of its officers and directors, (iii) the location of the company’s registered office, and (iv) in some cases, a summary of the total number and classes of shares (or units) issued. Unlike many foreign jurisdictions, where detailed stockholder information is required to be filed and maintained in companies houses or other public registries, details of stockholdings are not generally required to be disclosed publicly by private (non-public) companies in the United States. It should be noted, however, that, apart from the relatively minimal disclosure requirements of most states as they relate to the formation and maintenance of a business entity in that state, foreign owners of U.S. businesses may be subject to other state or federal disclosure and filing requirements depending on the classification of business they operate; the types of products they manufacture, distribute, or sell; and the percentage of the U.S. entity that is owned or controlled by foreign persons. This is particularly applicable to businesses operating in the agricultural, banking, communications, defense, energy, and transportation industries.

(3) Cost of Formation

(a) Filing Fees (State of Formation). The fees charged by a jurisdiction for the filing and acceptance of a business entity formed in that jurisdiction generally range from a few hundred to a few thousand dollars, depending on the jurisdiction and the type of business structure being formed. In addition, all states require entities formed or qualified in that state to file an annual report (or its equivalent) each year to update the information on record for that entity and to maintain the entity in good standing. A relatively small annual fee (generally between $100 and $500) is charged for this annual update. Some states calculate this annual fee for corporations based on the number of shares that have been authorized to be issued by the company. For companies that have authorized large numbers of shares, this calculation can result in significant annual fees. Thus, it is important for companies formed in these jurisdictions to take this into consideration when determining share structure and capitalization.

(b) Filing Fees (Other States). When calculating formation and maintenance costs for U.S. entities, it is also important to consider not only the jurisdiction where the entity will be incorporated, but also whether it will be carrying on business in other jurisdictions. For a company registering its business in one state while maintaining its actual business operations in other states, this company would be required to file as a “foreign” entity in those other states (“foreign” meaning it is not originally formed in those other states). Each such other state will charge the company an application fee and annual reporting fees (usually a few hundred dollars per year). The specific definition of “carrying on business” differs between jurisdictions, but generally, entities
will be deemed to be carrying on business in a state if they have an office in the state, hold assets in the state, employ significant numbers or types of employees in the state, or engage in the construction of structures in the state.

(c) Registered Agent Fees. Companies are also required to appoint and retain a registered agent in any state in which they conduct business. The role of the registered agent is to accept service of legal process, such as lawsuits or other legal documents, on behalf of the company in that state. If the company has a physical address or office in a state, in most cases it is permitted to use that address as its resident agent address in the state. If a company does not have a physical address in a state where it is registered to do business, it will need to appoint a third-party to act as its registered agent in that state. There are a number of regional and national corporate services companies that act in this capacity. The cost ranges between $100 and $350 per year for this service in most cases.

II. Types of Business Structures

(1) Corporation

A corporation is an entirely separate and distinct business entity from its owners, whose ownership is represented by shares of stock in the corporation (hence they are also known as “stockholders” or “shareholders”). A corporation may have a sole shareholder, a few, or a large number of shareholders. Corporations may issue different classes of shares and designate different series of shares within a class, thereby allowing a corporation to grant different rights to different shareholders.

Corporations are created and regulated by the corporate laws of their state of incorporation as well as corporate laws (both statutory and common-law) in any other jurisdictions in which they are qualified to conduct business.

The day-to-day activities of a corporation are managed by officers who are appointed by the board of directors, the members of which are elected by shareholders to oversee their interests as owners of the corporation. In essence, the shareholders own the corporation; the board of directors is elected to oversee the operation of the corporation for the shareholders; and the officers are the operators of the corporation. Both the officers and the directors of a corporation have a fiduciary duty to act in the best interests of the shareholders.
One of the main advantages of incorporation is that personal assets of the shareholders, directors, and officers are protected from creditors of the corporation if certain corporate formalities are observed, such as keeping corporate funds separate from personal funds, holding regular meetings of directors and shareholders, keeping minutes of the meetings, and maintaining detailed financial records. Additionally, if the corporation is a subsidiary of a foreign parent, creating a U.S. corporation can act as a shield for the assets of the foreign parent company and mitigate to some extent the rights of creditors of the U.S. company to bring actions against the parent.

(a) Formation

Corporations are formed through the filing of a Certificate of Incorporation or Articles of Incorporation (commonly called the “charter”), depending on the state, with the appropriate state authority.

The incorporator is the person responsible for establishing the corporation and filing the charter with the appropriate state authority. The incorporator also will appoint the initial board of directors and adopt the bylaws (which are the governing rules by which the corporation operates) by a written consent, executed after the corporation has been formed. Once done, the incorporator will relinquish his or her duties as the incorporator. The board of directors then ratifies the actions of the incorporator, appoints officers, approves the issuance of shares to the shareholders, and approves other matters necessary for the initial stages of the corporation (such as opening a bank account).

(b) U.S. Federal Income Tax Implications

---

1 This summary does not contain a comprehensive discussion of all U.S. federal income tax consequences that may be relevant to a foreign investor in view of that investor’s particular circumstances, nor does it address any state, local, estate, foreign or other tax consequences of an investment in the United States by foreign investors. Foreign investors are urged to consult with their own tax counsel as to the U.S. federal income tax consequences to such investor as a result of an investment in the United States.
Foreign investors need to consider whether the nature of their activities or investments in the United States is such that they could be treated as engaged in a U.S. trade or business for purposes of U.S. federal income taxation. Foreign investors are taxable on a net basis on any income that is “effectively connected” with the conduct of a U.S. trade or business (effectively connected income, or ECI).

Foreign investors may opt to invest in a U.S. corporation to “block” or avoid realizing ECI. The blocker corporation incurs and pays U.S. federal income tax on its operating income (ECI) and thus blocks such income from reaching the foreign investor. The corporation pays U.S. federal income tax on a net basis (21 percent maximum corporate tax rate for tax years beginning after December 31, 2017 pursuant to the enactment of the Tax Cuts and Jobs Act of 2017). Any net after-tax proceeds distributed by the corporation to the foreign investor generally will not be treated as ECI, but rather will be U.S. source dividend income subject to withholding tax. The foreign investor generally will not have to file income tax returns with the U.S. Internal Revenue Service (IRS) with respect to its investment in the corporation.

Provided that a foreign investor (individual or corporation) undertakes no activities in the United States that would cause the investor to be engaged in the conduct of a U.S. trade or business, the U.S. federal income tax liability of such foreign investor generally will be limited to tax (payable through withholding) at a flat rate of 30 percent (or lower tax treaty rate) on certain gross income from U.S. sources, such as dividends and interest. This type of income is non-ECI and is commonly referred to as “FDAP” (fixed, determinable, annual or periodic) income. The foreign investor may be eligible for benefits (an exemption from, or a reduced rate of withholding) for certain FDAP items under an income tax treaty in effect between the United States and the investor’s country of residence.

Accordingly, foreign corporations and individuals that are shareholders in a U.S. corporation are subject to a flat tax rate on U.S. source dividends received from the corporation. If the U.S. payor corporation withholds and remits the proper amounts to

---

2 Individuals who are neither U.S. citizens nor residents of the United States for tax purposes (nonresident aliens) and entities treated as foreign corporations for U.S. tax purposes.

3 The tax issues associated with investments by foreign investors in U.S. real property interests are beyond the scope of this article.

4 This article does not address withholding tax relating to foreign accounts under Sections 1471 through 1474 (FATCA) of the Internal Revenue Code of 1986, as amended. FATCA generally imposes a withholding tax of 30 percent on certain gross amounts of income not effectively connected with a U.S. trade or business paid to certain “foreign financial institutions” and certain other U.S.-owned “non-financial foreign entities,” unless various information reporting requirements are satisfied.
the IRS, foreign investors\(^5\) that are individuals or corporations will not be required to file U.S. federal income tax returns or pay additional U.S. federal income taxes solely as a result of their investment in the U.S. corporation.

Certain types of income are specifically exempted from the 30 percent tax and thus withholding is not required on payments of such income to foreign investors. The 30 percent tax does not apply to U.S. source capital gains (whether long- or short-term) or to interest paid to a foreign investor on its deposits with U.S. banks. The 30 percent tax also does not apply to interest that qualifies as “portfolio interest” (certain U.S. source interest received by a nonresident alien or foreign corporation with respect to qualifying debt obligations).

(c) **Financing Options**

Compared to other business structures, corporations have access to a broader range of financing options, including the issuance of equity and the incurrence of debt to fund corporate activities.

In the United States, the default requirement to issue securities (debt and equity instruments) to investors involves registration of such transaction with the U.S. Securities and Exchange Commission (SEC). However, there are various exceptions to this rule, and many business entities choose to raise capital in the form of debt or equity pursuant to certain exceptions from registration. The most common of these exemptions is the “Regulation D” exemption promulgated under the Securities Act of 1933, as amended. While a Regulation D offering allows a corporation to raise capital without the cumbersome registration process required for a public offering, its major drawback is that the securities issued typically will be illiquid, as there will be no public marketplace for the securities of a corporation that is not “public.” If a corporation elects to register its securities and conduct a public offering, its securities may then be listed on a public market or stock exchange (such as a tier on the OTC Markets, Nasdaq, or New York Stock Exchange (NYSE)).

Traditional financing options from banks, such as term loans with fixed interest rates and long-term repayment plans, small business loans, and secured and unsecured lines of credit, are also available to corporations.

Under certain circumstances, a foreign parent entity may be able to provide a cross-border guarantee or security arrangement for a debt incurred in the United States by the U.S. subsidiary corporation. For example, in 2014, China adopted rules allowing “guarantees and security arrangements provided by Chinese entities of offshore

---

\(^{5}\) Foreign investors treated as trusts for U.S. federal income tax purposes are subject to special rules.
indebtedness” (“nei bao wai dai” in Chinese). This is normally accomplished through a Chinese parent company providing guarantee or security over its assets in China to a bank in China with operations in the United States, which provides a loan through the bank’s U.S. branch to the U.S. subsidiary of the Chinese company.

In addition, it is not uncommon for a foreign parent entity to make a loan to the U.S. subsidiary to fund its various stages of operation.

Other fairly traditional ways to access capital for a corporation would include the use of a small business credit card (based on both the owner and the company’s credit score, which also requires the owner to be personally responsible for repaying debt on the card) and a corporate credit card (based on the company’s credit history and financial performance).

(2) General or Limited Partnership

A general partnership is a business entity managed and operated by at least two people (the partners) who contribute money, property, labor, or skill and expect to share the profits and losses of the business. Each partner in a general partnership has unlimited liability for the partnership’s debts and obligations, meaning that each general partner can be sued for the full amount of the partnership’s debts and obligations. Each general partner contributes to the day-to-day management of the business and has the authority to make business decisions and legally bind the partnership in entering into contracts. The contributions, responsibilities and liabilities of the general partners are often equal, unless stated otherwise in a partnership agreement signed by all partners.

A limited partnership consists of one or more general partners with unlimited liability who manage the business, and one or more limited partners with limited liability (meaning that limited partners are not responsible for the payment of the partnership’s debts with their personal assets) who do not play an active role in the management of the business and have no authority to bind the partnership in entering into contracts.

(a) Formation

There is no filing requirement in most states to form a general partnership. The legal name of a general partnership is based on the names of the partners. Some general partnerships may choose to adopt a fictitious, assumed, or “doing business as” (DBA) name by filing with the relevant state authority.
A limited partnership is formed through the filing of a “certificate of limited partnership” (which name may vary from state to state) with the appropriate state authority. A limited partnership agreement signed by all partners sets the rules of managing the business and defines the rights, responsibilities, and liabilities among the partners.

(b) U.S. Federal Income Tax Implications

A partnership files an annual income tax return with the IRS to report the income, deductions, gains, and losses from its operations, but it does not pay U.S. federal income taxes. Instead, the partnership “passes through” any profits or losses to its partners. Each partner is required to report that partner’s distributive share (whether or not the partnership distributes cash to the partner) of the partnership’s income, gains, losses, deductions, and credits. Thus, it is possible that partners could incur U.S. federal income tax liabilities without receiving from the partnership sufficient cash distributions to defray such tax liabilities. This situation is commonly referred to as “phantom income.” After the end of each fiscal or calendar year, the partnership generally delivers tax information on a Schedule K-1 to the partners necessary for the completion of each partner’s income tax return.

If a foreign investor invests in a partnership that is engaged in a U.S. trade or business, the foreign investor will be treated as engaged in a U.S. trade or business. Thus the U.S. trade or business activities of a partnership are attributed to its foreign partners, regardless of how many intermediate partnerships separate the foreign partner from the underlying partnership that is engaged in a U.S. trade or business. Treaty protection is generally not available to foreign partners of a partnership engaged in a U.S. trade or business because most such partnerships have a permanent establishment in the United States. Furthermore, a partnership engaged in a U.S. trade or business must withhold U.S. income tax on any ECI of the partnership allocable to its foreign partners, regardless of whether the foreign partner has actually received a cash distribution.

Generally, gain recognized by a foreign partner from the sale of an interest in a partnership that does business in the United States is ECI. Thus, the foreign transferor partner will be subject to U.S. tax on their gain. The ECI gain will also be subject to 10 percent withholding tax on the amount realized on the sale. The purchaser (transferee) of the partnership interest must withhold tax from the sales proceeds, but if it fails to do so the partnership is required to withhold the amount of the tax plus interest from future distributions to the transferee (purchaser).

Subject to certain exceptions, U.S. federal income tax law imposes a 30 percent tax on interest, dividends, rents, royalties, and other FDAP income derived by a foreign person from U.S. sources. A U.S. (domestic) partnership with FDAP income must collect and remit the tax on behalf of the foreign partner.
(c) Financing Options

Forms of financing options available to partnerships are similar to corporations, although with some limitations. For example, partnerships typically are not publicly traded, and they will normally convert into corporations prior to an initial public offering (IPO). Moreover, when a partnership applies for a loan or line of credit from a bank, the personal credit history and financials of the partners will be reviewed by the bank in addition to those of the partnership.

When a partnership raises funds through a private offering of securities, it offers its partnership interests for sale. It may permit some or all of the existing partners to invest more capital into the partnership, or bring in new partners with new capital, which has the effect of diluting the percentages of ownership of the existing partners.

(3) Limited Liability Company

A Limited Liability Company (LLC) is a business structure combining structural elements of a corporation with the tax benefits of a partnership. Rules and regulations pertaining to LLCs vary by state.

Owners of an LLC are called members, whose ownership of the LLC is represented by their holding of a certain percentage of membership interests or a certain number of membership units (which are similar to shares of a corporation) of the LLC. An LLC is allowed to have different classes of membership interests or membership units, providing the flexibility to distribute voting rights and profits in different ways. Most states allow members to include U.S. and foreign individuals, corporations, and other LLCs.

LLCs may comprise a single member or multiple members. LLCs can be either member-managed, in which all members participate in the day-to-day operation and decision-making process of the LLC, or manager-managed, in which one or more managers are appointed by members as agents of the company to manage the business. A manager may be a member but does not have to be.

Like corporations, members of LLCs are not personally liable for the LLC’s obligations, debts, or liabilities. Although the maintenance of company formalities is not as stringent for LLCs as it is for corporations, it is generally considered good practice to follow similar guidelines and observe such formalities as corporations.

(a) Formation
LLCs are formed by filing a certificate of formation or articles of organization, depending on the state, with the appropriate state authority. Most states require that names of LLCs end with a certain designator, such as “Limited Liability Company” or “LLC.” Some states may have additional requirements for setting up an LLC.

An organizer, who does not have to be a member, is the person who files the certificate of formation or articles of organization to form the LLC. After formation, the organizer executes organizer resolutions (similar to incorporator resolutions), which list the members and/or managers of the LLC, and thereupon relinquishes the duties of the organizer.

Similar to bylaws of a corporation, the operating agreement of an LLC, signed by all members of the LLC, governs the internal operations of the LLC. While many states do not require operating agreements (without which state default rules apply), it is generally considered good practice for members of an LLC to have an operating agreement to delineate the rights, obligations, and rules pursuant to which the members will own and operate the LLC.

(b) U.S. Federal Income Tax Implications

An LLC may be treated by the IRS as either a corporation, partnership, or a “disregarded entity” (meaning an entity disregarded as separate from its owner for federal income tax purposes), depending on the number of members and any elections filed by the LLC with the IRS.

An LLC with at least two members is classified as a partnership for federal income tax purposes, unless it affirmatively elects to be treated as a corporation. The U.S. federal income tax implications of foreign investors investing in partnerships is discussed above (in “General or Limited Partnership”). An LLC with only one member is treated as a disregarded entity and the LLC’s income, gains, losses, credits, and deductions are reported on the owner’s income tax return, unless it elects to be treated as a corporation.

For LLCs treated as partnerships for U.S. federal income tax purposes, a foreign investor must pay tax on its share of the ECI generated by the LLC, regardless of whether the member has actually received a cash distribution from the LLC. Many foreign investors in LLCs prefer the LLC to file an election with the IRS to be taxed as a corporation to avoid having to file income tax returns with the IRS and paying U.S. income tax on its share of ECI as would be the case if the LLC were treated as a partnership or a disregarded entity for U.S. federal income tax purposes). Alternatively, many foreign investors opt to invest in a corporation to avoid having to file income tax returns with the IRS and paying U.S. income tax.
(c) Financing Options

LLCs have similar financing options as those available to partnerships, as well as limitations. When an LLC raises funds through a private offering of securities, it offers its membership interests for sale.

(4) Branch Office

A foreign company is not required to set up a separate U.S. entity in order to do business in the United States and could instead do so through a branch office. A branch office is an extension of the foreign company that conducts business directly in the United States and does not have its separate legal existence from the foreign company. This exposes the foreign company itself to U.S. tax and legal liabilities with respect to the branch office's operations.

(a) Formation

It is not necessary to form a new entity in order to set up a branch office. The foreign company will need to be registered as a “foreign corporation” (as defined under state law) by filing a certificate of authority to do business in the state where business will be conducted through the branch office.

(b) U.S. Federal Income Tax Implications

A foreign corporation that operates directly in the United States through its branch office will be subject to income tax on the income attributable to its U.S. operations. If the activities of the foreign corporation constitute a U.S. trade or business, the corporation would be subject to U.S. federal income tax on a net basis (21 percent maximum corporate tax rate for tax years beginning after December 31, 2017) and the 30 percent “branch profits” tax.

Foreign corporations are subject to U.S. tax on any income that is ECI. They are also subject to branch profits tax at a 30 percent rate on any deemed repatriations of ECI (generally, earnings and profits generated by the U.S. operations of the foreign corporation to the extent not reinvested in a U.S. trade or business). However, depending upon its country of residence and its ability to qualify for treaty benefits, the corporation might be eligible for an exemption from, or reduced rate of, branch profits tax pursuant to a treaty. Without treaty relief, foreign corporate investors could be subject to tax on ECI at an effective tax rate of 44.7 percent (54.5 percent for tax years beginning before January 1, 2018).

A foreign corporation that does not conduct a U.S. trade or business is nonetheless subject to tax at a flat rate of 30 percent (or a lower tax treaty rate) on the gross amount of certain U.S. source income that is not effectively connected with a U.S. trade
or business, generally payable through withholding. Income subject to such a flat tax rate includes, but is not limited to, dividends and certain interest income.

Certain types of income are specifically exempted from the 30 percent tax, and thus withholding is not required on payments of such income to a foreign corporation. The 30 percent tax does not apply to U.S. source capital gains (whether long- or short-term) or to interest paid to a foreign corporation on its deposits with U.S. banks. The 30 percent tax also does not apply to interest that qualifies as “portfolio interest.”

(c) Financing Options

Because it is not a separate legal entity, a branch office does not have the option to raise capital from private or public offerings.

Compared to a U.S. entity, a branch of a foreign company may experience additional scrutiny by a bank when trying to open a U.S. bank account.

II. Conclusion

The choice of structure for a particular business depends on many factors. This chapter touches briefly on a few important factors to consider and does not discuss all the factors that may be relevant, such as immigration laws, estate planning considerations, and tax implications for the foreign investors in their home countries. Foreign investors are strongly encouraged to consult with their legal, financial, and tax consultants in both the United States and their home countries to choose a business structure that best suits their business needs.
About Robinson & Cole LLP

Founded in 1845, Robinson & Cole LLP is a U.S. based law firm of more than 200 attorneys with 11 offices throughout the United States, including in the major metropolitan centers of Boston, New York, Philadelphia, Miami, and Los Angeles. We are a full-service law firm with experience in areas such as corporate formation, mergers & acquisitions, capital markets, U.S. securities laws, tax, immigration and employment, manufacturing/distribution, intellectual property and technology, construction/real estate and litigation. The firm represents companies of all sizes, with an emphasis on industrial companies that are small to medium-sized and/or are family owned.

Our International Experience

Robinson & Cole LLP has been representing international companies that wish to do business in the United States for decades. Our lawyers regularly represent clients around the world in connection with cross-border transactions with U.S. companies and with expansion into the U.S. market. We have a long history of advising companies located throughout Asia and Europe, and we take pride in understanding and adapting to the cross-cultural differences that may exist in how decisions are made based on history, culture and the different legal systems. Our lawyers are leaders in the economic community and have been invited to speak at the White House and the U.S. Department of Commerce events, and by U.S.-based economic development organizations that wish to attract companies to the United States.

Disclaimer

An Overview of Key U.S. Tax Considerations for Inbound Investment

Jillian Symes
Julia Tonkovich
Steve Wlodychak
As the world’s largest economy, the United States provides tremendous operating and investment opportunities, with an innovative and productive workforce, robust infrastructure, and lucrative markets. However, foreign businesses interested in investing in the United States can find it daunting to navigate the U.S. federal tax code and regulations, as well as state and local taxes. Inadequate preparation can create undue risk, result in increased and unanticipated tax costs, and ultimately impact the overall success of U.S. operations. In addition, overlooking potentially valuable tax and financial benefits, including federal, state, and local credits and incentives, can result in missed opportunities to reduce tax costs and benefit from capital and operational cost offsets.

This chapter is intended to provide businesses interested in investing in the United States with some general guidance about various levels of U.S. tax imposed on non-U.S. investors, as well as available government incentives. It is critical to consult with a qualified advisor before making any business or tax-related decisions to more fully understand the impact of those decisions on the specific facts of the investment.

### The Fundamentals of U.S. Federal Tax

**Who must pay?**

U.S. tax-resident individuals, citizens, corporations, and their foreign branches are subject to U.S. federal tax (and potentially state and local taxes) on their worldwide income. Conversely, non-U.S. tax resident individuals and non-U.S. corporations and partnerships are generally only subject to U.S. tax on income that is “effectively connected to a U.S. trade or business” (referred to as ECI) and U.S. source income that is “fixed, determinable, annual, or periodical” (FDAP). FDAP income generally includes U.S. source interest, dividends, rents, and royalties.

ECI must be associated with U.S.-based activity that rises to the level of a U.S. trade or business. Although the U.S. tax code does not define a U.S. trade or business, case law generally frames it as activity in pursuit of profit that is “considerable, continuous, regular, and substantial.” If the foreign parent or subsidiary is resident in a country that has an income tax treaty with the United States, business profits are subject to U.S. federal income tax only to the extent that the income is attributable to a U.S. permanent establishment (PE). In general, a PE requires a more permanent business connection with the United States, so it is possible that a non-U.S. company could carry on a U.S. trade or business that does not rise to the level of a U.S. PE (and therefore is not liable for federal income tax).

---

* The views expressed are those of the authors and do not necessarily represent the views of Ernst & Young LLP or any other member firm of the global EY organization.
**How much is the tax?**

For non-U.S. corporations, ECI is subject to federal tax at the same rate as applies to U.S. domestic corporations.

In addition to federal taxes, there may also be applicable state and local taxes on a non-U.S. corporation’s U.S. business income, discussed further below. A deduction is generally available on the federal income tax return for all state and local taxes; thus, despite the addition of state and local taxes, it is not unusual for a corporation to have a U.S. effective marginal tax rate of approximately 25 percent.

Tax on FDAP is withheld by the payor on a gross basis at a 30 percent rate, though this rate can be reduced (potentially to zero) under an applicable U.S. income tax treaty if the income recipient is eligible for treaty benefits. Certain exceptions to FDAP withholding tax may also be available under federal law.

*Additional taxes, including federal payroll taxes, duties and customs and a variety of other state and local taxes, may apply.

**Choice of Entity**

There are various ways a non-U.S. company can structure its U.S. business. The choice may be driven by customer requirements, business and commercial needs, though U.S. and non-U.S. taxes can also play a role. Typical business models include a representative office, branch office, or wholly owned subsidiary. Each has its own implications and compliance requirements for U.S. tax purposes; this discussion focuses on tax considerations associated with the models.
A representative office is the easiest option for a company just starting to do business in the U.S., and it may not trigger U.S. federal corporate income tax if the U.S. activities are very limited. A representative office may be appropriate for the very early stages of a company’s U.S. expansion but will likely need to be transitioned into a branch or subsidiary as the U.S. business grows.

A branch structure is similar to a representative office in that it does not require incorporating a separate legal entity, but a branch can perform a substantially broader range of activities than a representative office. A branch will, however, constitute a taxable presence in the U.S., which means that the business must annually account for and file U.S. federal income tax on the branch’s profits. The parent company of the branch will be considered the U.S. taxpayer, and, as such, the parent company’s other operating income could potentially be pulled into the U.S. tax net in certain circumstances. It is important that all related party transactions between the U.S. branch and the parent company are based on arm’s length U.S. transfer pricing principles.

Non-U.S. companies that intend to have people or property in the United States often choose to incorporate a wholly owned U.S. subsidiary to “ring fence” the U.S.-based activities. A subsidiary does not have to necessarily be incorporated in the state in which it is primarily doing business. It is common to incorporate in a state with flexible incorporation laws and then operate in many other states, which may require registering the corporation to do business in those other states and applying for a certificate of authority to do business there. As with branch structures, it is important that all related party transactions with the U.S. subsidiary are based on arm’s length U.S. transfer pricing principles to control the amount of profits subject to U.S. tax.

<tr>
<td><strong>Allowed functions</strong></td>
</tr>
</tbody>
</table>
Alternatively, some non-U.S. companies choose to operate through a U.S. limited liability company (LLC). For U.S. federal income tax purposes an LLC can elect different tax classifications. For example, an LLC with a single owner is, by default, classified as a disregarded entity (the equivalent of being classified as a branch) for U.S. tax purposes, unless the owner elects to treat it as a corporation. Likewise, an LLC with more than one owner is classified as a partnership, unless the owners elect to treat it as a corporation. These rules are commonly referred to as the “check-the-box” rules. Before choosing to use an LLC for U.S. business purposes, the non-U.S. company should carefully consider local country treatment of the LLC (such as whether it could be considered a hybrid entity).

### Financing U.S. Operations

U.S. operations can be funded via debt, equity, or a mix of debt and equity, though it is recommended that U.S. operations not be fully funded by debt. Although interest expense is generally deductible, the U.S. tax code imposes various restrictions on deductibility. In addition, the Internal Revenue Service (IRS) can recharacterize purported debt as equity for U.S. tax purposes, which could potentially lead to disallowed interest deductions and/or additional withholding tax liability.

Interest paid to a non-U.S. creditor is generally subject to a 30 percent rate of U.S. federal tax through the application of the FDAP withholding regime described above. This rate may be reduced (potentially to zero) if the creditor is eligible for benefits under an applicable U.S. income tax treaty. Certain exceptions to withholding are also available under federal

| **U.S. federal income tax** | **If activities are sufficiently limited, the representative office should not be subject to U.S. federal income tax.** | **Branch profits that are ECI are taxed at the 21 percent corporate tax rate.** | **Taxed at the 21 percent corporate tax rate.** |
| **Dividends** | **The representative office should not be able to pay dividends.** | **A 30 percent branch profits tax on deemed withdrawals from the branch (potentially reduced/eliminated under treaty).** | **30 percent dividends withholding tax (potentially reduced/eliminated under treaty).** |
| **State and local taxation** | **Varies depending on state tax nexus profile.** | **Varies depending on state tax nexus profile.** | **Varies depending on state tax nexus profile.** |
law. Note that most U.S. tax treaties contain a “limitation on benefits” article (an anti-treaty shopping provision) that limits treaty benefits to persons that have a measurable business nexus to their country of incorporation (for example, the country of residence of the ultimate owners, or the conduct of an active trade or business in the country where the non-U.S. company is resident). Eligibility for a reduced rate of federal tax on interest payments, whether the reduction is based on federal law or a tax treaty, should be confirmed prior to entering into any financing arrangements.

**Repatriation of U.S. Earnings**

Once U.S. operations become profitable, consideration should be given to how best to repatriate the cash to the home office. If a U.S. corporate subsidiary is established, dividends paid to the non-U.S. parent company are generally subject to a 30 percent rate of U.S. federal tax under the FDAP withholding regime described above. The 30 percent rate may be reduced (potentially to zero) under an applicable U.S. income tax treaty if the recipient is eligible for treaty benefits. For non-U.S. companies that are operating in branch form in the U.S., a federal branch profits tax imposes similar withholding (and relief from branch profits tax may also be available under a U.S. income tax treaty).

In some cases, a non-U.S. company may choose to utilize debt to fund U.S. operations to repatriate cash back to the home country office if the federal withholding tax rate on interest is less than the federal withholding tax rate on dividends.

**State, Local, and Other Taxes**

In addition to the activities and structures that generate U.S. federal income tax liability, inbound companies (depending upon where they locate, how they conduct their business, and to whom they sell their products) can also be subject to subnational state and local income taxes, as well as certain non-income taxes, such as sales and use taxes, gross receipts taxes, real and personal property taxes, unemployment and payroll taxes, among others.
State income taxes

Non-U.S. companies expanding into the United States may be surprised to learn that they may be subject to state income taxes not only in their state of incorporation, but in other states as well. States generally impose tax when a company creates state tax “nexus” in the state. Nexus is generally formed when a company has people or property in a state, even temporarily (and increasingly, some states also have economic nexus rules whereby a liability could exist even without people or property in that state so long as the company has made a threshold level of sales to the state). As such, it is possible for a non-U.S. company to create state tax nexus in multiple states.

Although most states use federal taxable income as a starting point for calculating the state tax liability, each state may provide significant additions to, or subtractions from, that amount to determine state taxable income. States typically do not allow the same amount of depreciation and usually will add back state and local taxes, among other items, to determine the state tax base. Thus, the state income tax base could vary widely from state to state. In addition, and quite unusual compared to other countries around the globe, the states rely upon formulary apportionment to divide the tax base of a multi-state business. In the past, most states used a blended factor comparing the ratio of property, payroll, and sales in the state compared to everywhere the taxpayer was engaged in business. Now, increasingly the states rely solely upon a sales factor to apportion the tax base among the states. In some cases, certain types of income, such as income from the sale of real property located in the state or from certain intangible income, is allocated entirely to one state, although these rules vary from state to state. In theory, there should not be double taxation amongst the states as the total income of a company should be allocated and apportioned amongst the states where the company has created nexus, but because there is no mechanism among the states to settle double taxation disputes, it is possible that a single stream of income could be subject to taxation by more than one state.

In general, states may choose whether to conform to the federal Internal Revenue Code (IRC) and may even pick and choose which parts of the IRC to which they wish to conform. Some states opt for “fixed date” conformity, which means that they follow the IRC as of a certain date. Some states choose “selective” conformity and adopt only certain IRC provisions or conform to those provisions at different times compared to their original date of adoption for federal income tax purposes. Others practice “rolling” conformity,
automatically updating their reference to the IRC on a continual basis and thus conforming to the most recent version of the IRC as it is amended.

In addition, it is possible to create state tax nexus (and thus a state tax liability) even if there is no federal tax due, such as when a treaty eliminates the federal tax liability, because U.S. tax treaties are limited by their terms solely to the U.S. federal income tax (other than the non-discrimination provisions). Thus, non-U.S. companies should be aware that if they believe they do not have a U.S. PE and are thus not subject to U.S. federal income tax, they may still have sufficient state nexus to be subject to state income taxation. These rules governing tax presence vary widely from state to state and, notably, even with respect to particular state or local taxes within a single state.

**Sales and use taxes**

Unlike many other countries, the United States does not impose a national sales tax or value-added tax (VAT). Instead, such consumption-based taxes, known as sales and use taxes [but which may go by other names such as a “general excise tax” (in Hawaii) or a “transaction privilege tax” (in Arizona)], are levied in all but five states. In most states, in addition to the state-wide sales tax, counties, cities, and other local regional authorities are entitled to levy their own sales and use taxes. Fortunately, in most states, these additional local jurisdictional sales and use taxes are merely imposed as an incremental addition to the existing state sales tax base and collected by the same state taxing authority. However, in certain states, some local “home” rule jurisdictions are granted the authority to administer their own sales and use taxes separately from the state, meaning that they may have a tax base that is different from the state’s and may require taxpayers to file and report such local taxes separately as well. Sales taxes are typically assessed on the final consumer purchase, with wholesale transactions usually exempted. Generally, all sales of tangible personal property occurring within a state are subject to sales tax unless specifically exempted by statute. In most states, sales of services and intangible property (such as electronically delivered software) are usually excluded from sales tax unless specifically taxable. It is the seller’s responsibility to collect and remit sales tax, although state and local law typically allows the cost to be transferred to the consumer.

Prior to the 2018 U.S. Supreme Court ruling in *South Dakota vs. Wayfair, Inc. (Wayfair)*, a company generally needed to have a physical presence in a state to trigger an obligation to levy and remit sales tax on sales within a state. The *Wayfair* ruling eliminated the physical presence standard, meaning sellers may be required to collect sales tax on transactions with remote consumers that previously were not subject to sales tax. After the *Wayfair* ruling, many states enacted presence thresholds for sales and use tax purposes that apply

---

depending on the dollar amount of sales and/or number of transactions within the state (typically either $100,000 or more of revenues derived from sales to consumers in the state, or 200 or more transactions with consumers located in the state, although these thresholds vary from state to state). Moreover, in response to the rapid development of online retailers who allow third-party retailers to sell through their internet portals, nearly every state now imposes a sales tax collection responsibility on the operators of the internet sales portals.

Non-U.S. companies selling into the United States (including those without a physical presence in the United States) should assess their potential sales tax obligations following the Wayfair ruling and the ongoing changes in state and local tax laws in response to that ruling, and ensure they have compliance and reporting processes in place to satisfy any obligations. Even though the state and local taxing authorities may not have an immediate ability to enforce collection, the failure to file returns means that the statute of limitations for sales tax collection assessments remains open indefinitely. Non-U.S. companies that do not comply may later be surprised to learn they have significant state and local sales tax liabilities.

**Employment taxes**

Human capital is an area that can become quite challenging for an inbound company, especially if the home country headquarters is left to deal with the diverse and often complex requirements of federal and multistate taxing jurisdictions. Many businesses coming to the United States decide to outsource some or all of their human resource management activities such as payroll and benefits administration since these areas require considerable local knowledge.

1. **Social security tax**

Under the Federal Insurance Contributions Act (FICA), social security tax is imposed on wages or salaries received by individual employees to fund retirement benefits paid by the federal government. For 2020, the social security tax is 15.3 percent. Half of the tax (7.65 percent) is withheld from the employee’s wages and half (7.65 percent) is paid by the employer. The portion relating to the social security portion of the federal tax is subject to a wage limitation that periodically changes while the portion relating to the
federal Medicare program (1.45 percent imposed on each of the employer and the employee) is not subject to any such limitation.

2. **Federal unemployment tax**

Federal unemployment tax (FUTA) is imposed on the wage payments that employers make to their employees for services performed within the United States regardless of the citizenship or residency of the employer or employee. The 2020 projected tax rate is 6 percent on the first $7,000 of wages of each employee. Connected to this federal unemployment insurance program, most states also impose their own unemployment taxes that are creditable against FUTA tax when paid; rates vary from state to state as well as on the historic unemployment performance of each particular employer.

3. **Employer reporting and withholding**

An employer (whether a domestic or foreign United States employer) is responsible for withholding and remitting United States federal, state and local income and social security taxes from the wages of resident and nonresident alien employees. The employer is also responsible for reporting the compensation income of its employees working in the United States.

**Federal, state and local credits and incentives**

Although the U.S. network of federal, state, and local taxes can be complex to navigate, there are also federal, state, and local incentives available for inbound investors where the investment involves material capital investment, research and innovation, or leads to job creation. These can include tax credits, abatements, cash grants, land grants, low interest loans, and other benefits. Companies should consider a strategy for identifying and securing these investment incentives as they can help mitigate upfront costs and ongoing operational costs associated with investing in the United States, as well as strengthen the inbound investor’s relationship with the U.S. communities in which it does business.

**Glossary**

**Branch profits tax (BPT):** The branch profits tax, which simulates the tax treatment of a corporation that issues dividends, is a 30 percent U.S. federal tax on deemed withdrawals from a branch. The tax base for the branch profits tax is the dividend equivalent amount, which is essentially the branch earnings for the year less the amounts reinvested in the United States. In some cases, the 30 percent branch profits tax can be reduced or eliminated by treaty.

**C corporation:** Under U.S. law, most corporations are established in accordance with the law of the state of incorporation. Although the corporate laws of most states are similar, those of certain states are more flexible than others. A corporation has a separate legal
identity distinct from its shareholders. This can be used to cap any risks that may be inherent in a branch or partnership. A “C corporation” is a reference to the United States federal income tax treatment of a corporation under Subchapter C of the IRC. Most corporations are treated as “C corporations” unless special elections or qualifications apply. Use of a C corporation also prevents United States profits and losses from flowing up to the shareholders. The profits earned by a C corporation are subject to a 21 percent federal income tax rate (plus any applicable state and local taxes) in the United States.

**Effectively connected income (ECI):** Income that is effectively connected to a U.S. trade or business associated with activity that is considerable, continuous, regular, and substantial. ECI is generally used to determine what foreign corporations and their U.S. branches and partnerships are subject to U.S. tax.

**Fixed, determinable, annual, or periodic income (FDAP):** Includes dividends, interest, rents, and royalties; generally excludes gains from the sale of real or personal property.

**Federal Insurance Contributions Act (FICA):** A social tax imposed on wages or salaries received by individual employees to fund retirement benefits paid by the U.S. federal government.

**Federal unemployment tax (FUTA):** Imposed on the wage payments employers make to their employees, regardless of the citizenship or residency, for services performed within the United States.

**Internal Revenue Code (IRC) of 1986, as amended:** The basic federal income tax law for the United States.

**Internal Revenue Service (IRS):** The agency of the U.S. federal government responsible for enforcing U.S. federal tax laws, collecting taxes, processing tax returns and issuing tax refunds.

**Limited liability company (LLC):** An entity created under state law. From a U.S. federal income tax perspective, an LLC is an eligible entity that can be treated as either a partnership, a corporation, or a disregarded entity. An LLC may be disregarded only if it has a single member (i.e., owner). If it has two or more members, unless it elects to be treated as a corporation, an LLC is treated as a partnership for U.S. federal income tax purposes (provided it does not engage in certain businesses for which such an election is not permitted). From a state business law perspective, LLCs provide their members with liability protection similar to that offered to shareholders by being organized in corporate form.

**Permanent establishment (PE):** A fixed place of business through which the business of an enterprise is wholly or partly carried on, which most U.S. double tax treaties say includes a place of management, a branch, an office, or a factory.
Sales and use tax: Sales and use taxes in the United States are generally assessed at the state and/or local level and are usually assessed on the final consumer purchase, with wholesale transactions remaining tax exempt. As a general rule, all sales of tangible personal property are subject to sales or use tax unless specifically exempted by statute (sales of services and intangible property vary by state). Use taxes are imposed on the use, storage, or consumption of tangible personal property by a business itself, within a state’s borders.

State tax nexus: Generally refers to the requisite business activity in a state or local taxing jurisdiction sufficient to allow a state to impose an obligation to pay or collect and remit a tax. Based on U.S. Supreme Court rulings, state tax nexus can be limited by provisions of the U.S. Constitution. Moreover, state laws may also establish the thresholds by which a taxpayer may have sufficient connections to the state to be subject to a state tax payment or collection obligation [generally based upon physical presence, such as the presence (even on a temporary basis) of employees or independent contractors in the state, leased property in the state, or based on the dollar amount or number of transactions occurring in the state]. Such rules vary from state to state and also, even within the same state, based upon the type of tax. As indicated elsewhere, U.S. income tax treaties by their very terms do not apply to the states. Consequently, even though a non-U.S. company may not have a PE in the United States due to the invocation of treaty protection, it may still have “state tax nexus” and an obligation to pay or remit certain state or local taxes.

U.S. trade or business: There is no comprehensive definition of a U.S. trade or business; it is largely defined by case law. In order to make a determination of whether a trade or business exists, the owner’s level of activity must be measured. Activity in pursuit of profit that is “considerable, continuous, and regular” is necessary to establish a trade or business.

About EY

EY is a global leader in assurance, tax, transaction and advisory services. The insights and quality services we deliver help build trust and confidence in the capital markets and in economies the world over. We develop outstanding leaders who team to deliver on our promises to all of our stakeholders. In so doing, we play a critical role in building a better working world for our people, for our clients and for our communities.

EY refers to the global organization, and may refer to one or more, of the member firms of Ernst & Young Global Limited, each of which is a separate legal entity. Ernst & Young Global Limited, a UK company limited by guarantee, does not provide services to clients. For more information about our organization, please visit ey.com.

This chapter does not constitute legal advice. Readers interested in investing in the United States should consult legal counsel.
Workforce

Creating Employment Success in the United States

Michael Sachs, Senior Attorney
Adam Boland, Member
Vanessa Kelly, Senior Attorney
Paul Starkman, Member
Charles Russman, Senior Counsel
The key to any organization is people, and any company doing business in the United States will have to recruit, interview, hire, and manage a workforce. The process of hiring and managing a U.S.-based workforce may differ greatly from those practices customary in other countries. In the United States, employers are regulated by (1) federal laws that apply to all companies regardless of location; (2) state laws, for the individual state(s) where the employees are physically working; and, (3) local- or city-based ordinances in some larger cities. Also, the law may be shaped by “public policy” considerations and court decisions. Employers are generally afforded great latitude in structuring their workplace policies and practices. This freedom, however, is not without limits, as federal, state, and local laws regulate such areas as minimum wage and other issues relating to the payment of wages and prohibit workplace decisions taken for discriminatory reasons. There are also other types of protections, including those for disabled or pregnant workers.

This chapter is designed to provide a general overview of federal, state, and local laws; how these laws work to protect employers and employees; and how the United States works to provide safeguards against discrimination through the classification of people into “Protected Classes.” In fact, these protected classes should be some of the most important considerations for employers as they delve into the laws governing the workplace. Title VII of the Civil Rights Act of 1964 and corresponding federal civil rights statutes define who is protected. In the United States, employment laws prohibit discrimination based on these protected characteristics, which Federal law identifies as age, race, sex and gender, national origin, disability, color, and religion. Several U.S. states and some local governmental entities have added to these categories to provide broader protections.

Section 1 – The Employment Relationship

Recruitment

In a nutshell, recruitment cannot show a preference for a class of people or discourage someone from applying because they are in a protected class. This is true whether an employer recruits through job postings, recruiters, or word of mouth. For example, job postings cannot seek “females” or “recent college graduates,” since the first would show a preference for women and discourage males from applying, and the second would discourage people over 40 from applying. Likewise, employers cannot direct their
recruiters to only interview people inside or outside protected categories or recruit in a way that will only yield members outside the protected categories. Therefore, employers should review job postings for potential issues to ensure neutral language and impact and review directions given to recruiters. There are also some state-specific restrictions on what employers may inquire about pre-hire, such as salary histories.

Employee benefits are an essential part of U.S. recruitment and compensation. While benefits vary by size of the business, geographic region, and sector of the economy, the most common are health care (medical, dental, and vision), retirement plans, and paid time off. Some less common, but still popular, benefits include incentive programs, education reimbursement, and discounts on some products. Employee benefits are constantly evolving to incorporate new concepts and new expectations from employees. Many companies are reassessing their benefits in light of the priorities of the workforce they are looking to attract and retain. Each employer is free to choose the types of benefits they offer and how these benefits are provided. However, some benefits must be offered uniformly to all similarly situated employees. There are also some selected benefits that can be tailored for specific employees or potential employees. A key point to remember is that the legal requirements and restrictions are changing as fast as the benefits.

**Interviews**

Like recruitment, employers should not inquire into, or make decisions based upon, an applicant’s disability, race, color, gender, sex, national origin, age, or religion. Employers should avoid asking questions about family or marital status and club or union membership. Instead, interview questions should be limited to determining if a person is qualified for the job. For example, if a job requires an employee to lift 50 pounds, the interviewer can ask if the applicant meets all the required qualifications. On the other hand, the interviewer should not ask, “I see you are in a wheelchair. Can you still lift 50 pounds?” Similarly, if an employer requires applicants to take a test as part of the hiring process, the test must be related to the job and may not exclude people because of their membership in a protected category.

**Ban the Box Laws**

Multiple states (14 at the time this chapter was drafted) have implemented so-called “Ban the Box” laws. These laws are designed to limit or eliminate employers’ ability to inquire into past criminal convictions or use past convictions in hiring decisions. While these laws
vary between states (and localities), they generally: restrict the type of conviction that can be asked about; limit the ability to use past convictions in hiring decisions; delay background checks; and require that employees be notified when criminal information is used in hiring decisions. Several localities within these states have additional requirements on what information can be sought or used. Some states require a detailed analysis be undertaken before rejecting a candidate based on a criminal conviction.

**Pre-Hiring Drug Testing**

Pre-hiring drug testing is another area where the laws and requirements vary dramatically between various states and localities. Some states have no restrictions on pre-hiring drug testing; others have some limited restrictions. Certain localities go even further by eliminating the ability to require pre-hiring drug testing, except under very limited situations, or by restricting employers from testing for certain drugs such as cannabis, except in certain narrow circumstances. Some states that permit the use of medical marijuana have revised testing procedures to accommodate the use of cannabis outside of work. There is some tension between federal and state law on the issue of drug testing. Some employers who have federal contracts, federal grants, or are subject to Department of Transportation (DOT) or Department of Defense (DOD) guidelines, may have more expansive drug testing requirements than those permitted under state law.

**Managing the Workforce**

Employers have great latitude about decisions on promotions, pay increases, discipline, or termination. However, employers must be mindful to follow Equal Pay Act laws and other non-discrimination laws in making these important workplace decisions. Again, employers must consult federal, state, and local laws on these topics. (Refer to Section 4: Compliance) In general, employers are free to design pay policies based on merit, performance metrics, client development, or other important considerations without being lock-stepped solely by tenure or the position level.

**Section 2 – At-Will Employment**

Almost every state in the United States applies some version of the “at-will” employment doctrine. Generally, the at-will doctrine means that either the employee or employer may terminate the relationship at any time, without notice or “cause.” Any employment decision, even taken in a state that follows a broad application of the at-will employment doctrine, must still comply with all federal, state, and local laws regulating employment decisions, including protected classes.

The at-will doctrine may be a new concept for international business investors, who may be accustomed to hiring through employment contracts with a fixed term (duration) that may restrict the ability to terminate employees. Under the at-will doctrine, there is no set term
of employment, no standard affecting employment decisions, and, as a result, each party can end the employment relationship at any time. In short, the doctrine does not require a long-term commitment by either party. In an at-will situation, an employee who simply wishes to stop working can end the employment relationship at any time, as can the employer. Indeed, since 1888, Texas has held that employers can terminate an employee for good cause, bad cause, or no cause at all. Most other states have court decisions that contain similar holdings.

Employers and employees can disregard the at-will doctrine by entering into contracts that specify the length of employment and the conditions for, and consequences of, termination. Even without an express written contract, however, the doctrine does have some limitations. Even though the at-will employment doctrine presents a straightforward approach to the employment relationship—both parties will continue to work together if each party desires to continue the relationship—the application of federal and state law supersede the doctrine. The most obvious exception is that an employment decision cannot be based on an act or reason that has been deemed “illegal,” and for purposes of this chapter any hiring or firing practices where the decision is based on the employee's identification with any protected class is illegal.

In addition to non-discrimination limits, several states provide protection against “retaliation,” such as termination because an employee has engaged in whistleblower activities (such as reporting illegal or fraudulent conduct; filing a complaint about discrimination or unpaid wages; seeking workers’ compensation benefits; or engaging in some other protected action).

Moreover, when applying the at-will employment doctrine, some states exercise an amended version of the doctrine. For example, some states apply an implied contract exemption to the doctrine, meaning employers can establish a “just cause” standard for employment decisions through a contract, an employee handbook, or other employment policies. Further, some states applying the doctrine also exercise a good faith exemption. In these states, even though the at-will doctrine applies, an employer may only terminate employees for “just cause.”

While the at-will doctrine provides employers with a fair amount of flexibility, there are limits based on federal, state, or local law that must be considered. Employers should take care that internal personnel policies do not create contractual expectations. As a practical matter, most employers use caution when terminating employees.
The expense of hiring and training and the impact on employee morale are all important considerations that practical employers evaluate before terminating employment.

In addition, unemployment insurance is an important consideration. Most states require that employers contribute monies into a state unemployment insurance fund administered by the state government. Employees who are terminated are often eligible to make a claim for unemployment benefits, which is a partial wage replacement for a period to assist the employee until he or she can locate new employment. The amount the employer is required to contribute to the fund is determined by several factors, including the total amount of the payroll dollars and the employer’s claims experience. If an employer has high turnover of its employees, and many former employees file for unemployment benefits, the employer is likely to receive a risky rating and may be required to contribute a higher percentage based on its adverse claims experience. Employers and employees can submit information relating to the termination and claim; employers can object; and there are limited appeal rights if either employee or employer disagree with the findings of the unemployment claims examiner.

As a practical matter, employees who do not understand why they are terminated are more likely to file an administrative or court claim against their employer alleging discrimination or wrongful termination. As such, most employers attempt to resolve performance problems and terminate only where the problems are unsolvable, the employee is unsuitable, or there are financial issues compelling the termination.

Section 3 – Use of Employment Agreements

An employer may decide that it is useful to have employment agreements for its executives or key employees. This type of agreement is helpful to cover such essential terms as: (1) length of employment; (2) expanded notice upon resignation; (3) compensation and bonus structures; (4) equity participation; (5) termination for cause or without cause; (6) severance; (7) post-employment restrictions, such as non-competition, non-solicitation, and non-disclosure covenants; (8) detailed performance expectations; (9) housing, car, or entertainment stipends or allowances; and (10) relocation benefits and expectations. If the business is a start-up or encountering financial difficulties, the agreement may cover a “stay bonus” or otherwise incentivize remaining with the employer for a period. Severance provisions can be important as a method of pre-negotiating the end of the employment agreement, minimizing the consequences of any
potential emotions. Often, severance agreements are conditioned on the employee giving up the right to make a post-employment claim for damages, where permitted.

In addition to executives, employment agreements are useful for employees who have access to, and work with, trade secrets and confidential information; who are hired to invent or work on research and development (R&D) activities; or where the employee will be responsible for developing good will (sales). There is federal and state statutory protection for some of an employer’s intellectual property rights; however, in the absence of a written agreement and affirmative steps to safeguard proprietary information, an employer’s rights may be unsettled or result in shared ownership of an intellectual property asset. Employers may wish to impose post-employment restrictions on working for a competitor, soliciting employees or customers, or disclosing confidential information. Invention agreements detail ownership rights in intellectual property conceived or developed by the employee with the employer's time or resources. An employer may elect to have stand-alone agreements covering the protection of trade secrets, good will, non-competition, or intellectual property rights. Employers may instead include these post-employment restrictions in a general employment agreement covering the topics identified in the preceding paragraph.

State law varies on the requirements for such agreements and their ultimate enforceability. All agreements must be supported by “consideration.” In legal terms, consideration is a bargained-for exchange of something of value for something else of value. The parties of the agreement can decide if what they are exchanging is valuable enough to be part of the agreement. Sometimes, continued employment can be deemed sufficiently valuable and therefore enough “consideration” to uphold the agreement. The agreements themselves must be reasonable in scope, duration, and geographic area subject to the post-employment restraints. In addition, they must support legitimate interests, such as protection of trade secrets or goodwill. Under no circumstance can they be created for the sole purpose of limiting competition between similar goods or services. Lastly, the agreement cannot violate public policy, be injurious to the public interest, or unduly burdensome to the employee. Courts enforce these agreements to varying degrees; if this is of importance, employers should consult with employment counsel in their specific geography and/or their specific industry, as specialized aspects to these negotiations might exist.

**Section 4 - Compliance**

**Employment Laws**

U.S. federal and state employment laws generally prohibit discrimination, harassment, and retaliation based on protected classes, characteristics, and conduct. Most federal employment laws cover employers with 15 or more employees. Federal laws prohibit
discrimination based on race, color, national origin, religion, sex, disability, familial status, genetic information, citizenship, pregnancy, veteran or military status, and age (federal law protects employees who are over age 40, Oregon and the District of Columbia protect employees 18 and older, and Michigan and New Jersey protect employees of all ages). Federal law does not include sexual orientation as a protected class; however, at the time of publication, 24 states protect sexual orientation and/or gender identity/expression.

State employment laws expand coverage to smaller businesses or provide additional protection, such as:

- Height and weight: Michigan and Washington
- Possession of a driver’s license: California
- Exercise of free speech rights: Connecticut
- Reproductive health decisions: Delaware, Hawaii
- Family responsibilities: Delaware, the District of Columbia
- Personal appearance, matriculation, or political affiliation: The District of Columbia
- Credit history: The District of Columbia, Hawaii, Illinois, Oregon
- Breastfeeding: The District of Columbia, Illinois
- AIDS and HIV status: Florida, Missouri, Nebraska, Vermont
- Sickle cell trait: Florida, Louisiana, North Carolina, New Jersey
- Protective order status: Illinois
- Choice of a Sabbath: Kentucky
- Status as a smoker or non-smoker: Kentucky, Louisiana, Mississippi, New Hampshire, New Jersey, Nevada, Oklahoma, Oregon
- Exercise of right to bear arms: North Dakota

Medical and recreational marijuana users are protected in Arizona and to a lesser extent in Colorado, Connecticut, and Illinois. New Jersey and New York also prohibit hairstyle discrimination.

**Wage & Hour Laws**

The Federal Fair Labor Standards Act (FLSA) and the related wage and hour law enacted by individual states require that employers comply with minimum wage requirements. Where the state and federal rules differ, states can enact a higher minimum wage rule, but cannot go below the minimum threshold wage set by the federal government. Generally, federal and the various state wage and hour laws require that employers comply with minimum wage requirements; properly classify workers as exempt or non-exempt from overtime pay; and impose recordkeeping obligations, child labor restrictions, and posting requirements. The Federal Equal Pay Act requires that employers pay similarly situated employees the same wage, regardless of gender, if they perform jobs that require
substantially equal skill, effort, and responsibilities. There are some exceptions for compensation plans based on seniority or merit. Most states have enacted their own equal pay laws, and at least seven states have greatly expanded coverage to require equal pay on the basis of all protected characteristics.)

**Leave of Absence (LOA) Laws**

Federal and state LOA laws require employee LOAs in specific circumstances and prohibit retaliation against employees who exercise their LOA rights. The Federal Family Medical Leave Act (FFMLA) requires employers with 50 or more employees who work in a 75-mile (120-kilometer) radius to provide 12 weeks of unpaid leave for eligible employees’ own serious medical condition or the care of a covered family member. Other federal and state LOA laws require unpaid leave for military service; jury and witness duty; voting; victims of domestic violence or criminal activity; blood, bone marrow, and organ donation; school activity; pregnancy and nursing mothers; and voluntary firefighter, first responder, or civil air patrol. Although federal LOA laws require only unpaid leave, 13 states and various municipalities now require paid sick leave. Some companies may elect to exceed federal and state mandated requirements by offering incentives like paid leave as a benefit to employees.

**Required Harassment Prevention Training**

Federal law does not require that employers provide sexual harassment prevention training; however, it is required in California, Connecticut, Delaware, Illinois, Maine, and New York state, as well as some large cities. It is also recommended by the Equal Employment Opportunity Commission (EEOC) and the U.S. Department of Labor, as well as state agencies serving a similar purpose.

**Posters, Notices, and Filings**

U.S. employers must post conspicuous summaries of applicable federal and state employment laws. The Department of Labor (DOL) e-Laws Poster Advisor helps employers determine which federal law posters must be posted. States require additional posters for unemployment insurance, worker’s compensation, workplace safety, and wage laws. More information on [employment law poster requirements by state](#) can be found on a state-by-state basis.

**Work Eligibility Concerns**

All employers are required to have employees complete I-9 Forms and provide appropriate documentation that the employee is eligible to work in the United States. Employers are required to maintain such records and provide access to these completed forms if audited.
“Right-To-Work”

In the United States, workers in many industries have unions that are designed to help employees in bargaining for wages and benefits with employers. Unions are not necessarily present in all industries, and some unions are more powerful than others, but where unions exist, members pay dues. The “Taft-Hartley Act” (better known as The Labor Management Relations Act of 1947) implemented the right-to-work concept at the federal level by putting into law that employees can choose to join a union or not, pay dues or not, and cannot be forced out of their job if they choose not to join a union. In addition, employees who do not join the union can still benefit from the services offered by the union because the union exists to represent all employees. This relationship is so ingrained that employees who are not union members and/or do not pay dues can sue the union if they feel they were not well represented in their case against their employer. In addition to the federal-level regulation, 27 states and Guam have right-to-work laws currently in effect.

Section 5 – Privacy Laws

Employee privacy in the United States does not consist of a unified privacy law, but rather a series of laws at the local, state, and federal level, many of which apply only to specific aspects of privacy or certain sectors of the economy. At the federal level, there are several prominent laws dealing with privacy, three of which often come into consideration with hiring and employment matters.

First is the Federal Trade Commission Act (FTC Act), which governs the collection of personal information on websites. Most importantly, the FTC Act requires those collecting personal information from a website to specify what information is collected and how it will be used. This is critical to keep in mind when hiring individuals or seeking qualified candidates for a position through a website, even if a third party or add-in is used to do so. The FTC Act will apply if the information is collected by employers or for their benefit.

The second applicable federal law is the Health Insurance Portability and Accountability Act (HIPAA), which covers health benefits provided to employees once employed. HIPAA requires certain disclosures to employees and prohibits disclosure of protected health information without express authorization. Employers must also set up HIPAA-specific procedures and practices, conduct a risk assessment, and enter into agreements with third parties that may receive information subject to HIPAA on the employer’s behalf.

The third important privacy regulation is the Genetic Information Nondiscrimination Act (GINA), which prohibits employers from using genetic information to make most decisions about employees.

At the state level, almost every state and the District of Columbia has passed laws protecting their residents. While these laws differ greatly and are being revised and
expanded regularly, a few key components are common and applicable to employment. First, in the event personal information is used in a way that violates the law or is used contrary to its intended purpose, the individual must be notified about what happened, advised on how to prevent the risk of identity theft, and, in many cases, the employer must contact the state or federal government. Second, many states have passed laws prohibiting employers from requesting or otherwise accessing personal accounts of employees, especially social media. Third, individuals, including employees, must receive notice of their rights regarding their personal information and how their personal information is being used. This often goes well beyond what is required to comply with the FTC Act described above. Specifically, in some states, notices must be provided about where information is obtained, how long it is stored, who it is shared with, and whether it is sold as part of a dataset. Fourth, states are increasingly restricting when and how very sensitive information, such as biometric information, can be collected and used.

In all cases, employers must carefully monitor their data collection and maintain employee privacy, keeping such information well contained. Meeting these standards at the state and federal level requires the assistance of knowledgeable professionals. If data is exchanged outside of the United States in countries that have their own data protection laws, U.S.-based employers must comply with those laws as well.

**Section 6 – Employee Recourse**

If employers run afoul of federal, state, or local employment laws, aggrieved employees have several avenues to vindicate their rights. First, if the employer has workplace policies, the employee can use the employer’s internal resources, such as their manager or human rights manager, to address the departure from a workplace rule or law. Employees are not required to do this, but this is a viable option. An employee may file a complaint with either a federal or state civil rights agency, such as the EEOC or the state’s department of labor. Some laws require that the employee first file a complaint with such an administrative agency (called “exhaustion of administrative remedies”). Other laws do not require exhaustion and an employee can file a complaint with any court that has jurisdiction to hear the controversy – typically the state or federal court where the employee works or lives. Lastly, by agreement, an employer may compel the employee to pursue claims through an alternative dispute mechanism, such as arbitration.

**Conclusion**

The United States provides great investment opportunities and a well-educated diverse workforce. There is a substantial amount of freedom to recruit, manage, and retain a productive workforce. This chapter has sought to provide a high-level review of these key areas of flexibility as well as the restrictions that employers need to know. However, it is
strongly encouraged that any business consult legal advisors for more specific information about the legal requirements where the new business will operate.
Glossary

**Arbitration:** Arbitration is a private method of resolving a dispute without either party having to file a complaint with an administrative agency or court. The parties can use the rules established by a recognized arbitration association, set their own rules by contract, or refer to the federal or state arbitration act. The purported benefits to using arbitration are confidentiality (no public filing in an agency or court), shorter time to resolve the dispute, and a smaller expense of attorneys’ fees. There are downsides to arbitration, such as no judge to make decisions, no jury to hear the dispute, and limited appeal rights.

**At-Will Employment:** At-will employment is a policy that provides employee or employer with the freedom to end the employment relationship at any time, for any reason (except for an unlawful reason), without advance notice. In the absence of an employment agreement, or a specific federal or state statute, employers need not pay any separation pay, severance pay, or notice pay. Employers must comply with the law in terms of paying wages and accrued but unused benefits (such as vacation or sick time); otherwise, employers are free to create employment policies addressing what is payable at the time of termination.

**Employee Benefits:** Employee benefits typically refer to the accoutrements or emollients of employment, such as paid time off, health insurance, retirement plans, and flexible benefit plans. Most states do not require provision of paid time off, except for sick time. But most employers routinely provide time off not only for sickness, but personal reasons or vacation as well. Most states do not require payment of unused paid time off at the time of termination, but some do. If the employment policies or practices require such payment, then the employer must follow those policies or practices.

**Consideration:** Consideration* is a bargained-for exchange of something of value for something else of value (for example, the promise to work in exchange for payment).

**Exhaustion of Administrative Remedies:** A federal or state law may require that an employee file a complaint with a specific administrative agency before he or she can file the complaint in court. The idea behind exhaustion is that the specific administrative agency is charged with the responsibility to enforce the law and has expertise in interpreting the law, an interest in deterring violation of the law, and expertise and authority to issue a remedy, including a public-facing remedy. For example, if an employee wants to file a claim under Title VII of the Civil Rights Act alleging she was fired because she was a woman, she will first have to file the complaint with the EEOC and provide them with an opportunity to resolve the dispute before she can file a complaint with a federal or state court of law and submit her dispute to a jury.
**Federal Law:** Federal law refers to the United States Constitution and its Amendments, and the Acts passed by the United States Congress and signed by the sitting President. Various federal agencies having oversight or enforcement responsibilities for certain laws may publish regulations that interpret federal law and provide more detail on the scope of the law. Also, federal agencies may publish guidelines that provide interpretative guidance to regulatory bodies, employers, employees and the courts. In this paper, all these sources are considered federal law.

**State Law:** The United States is comprised of 50 sovereign states, each with its own executive branch, legislative branch, and judicial system. Instead of a president, states have governors. States are permitted to pass laws if the state law does not conflict with or override federal law. For example, the states can establish their own minimum wage which may differ from the federal law but cannot be a lesser amount than the federal minimum wage law. The states can enact more generous rules of law, but not more restrictive. Many states augment federal employment law by providing greater employment rights or benefits; however, some do not. The law of some states closely mirrors that of federal law. One approach is not better than the other. It is simply something to be aware of when conducting business in the United States. Business activities need to comply with federal and state law, and even local law, such as that enacted by larger cities.
About Clark Hill

Clark Hill is a multidisciplinary, international law firm that draws on our attorneys’ comprehensive industry and policy knowledge and a global network of industry advisors and subject-matter experts to provide innovative legal solutions and client-service excellence worldwide. Our work is guided by our deeply held shared values, including practicality, entrepreneurship, mutual respect, diversity, ethical behavior and a commitment to client and community service.

With more than 650 attorneys and professionals in 25 offices, spanning the United States as well as Dublin and Mexico City, we are a committed partner to a diverse range of leading brands, forward-thinking businesses, public entities, nonprofit organizations and individuals. Our significant presence in Washington, DC, and our deep government relations and public affairs experience at every level help ensure that our clients’ voices are heard in the development of federal and state regulatory policy and legislation.

FDI Restrictions

Limitations on Foreign Investment into the United States

Edward S. Rivera
Attorney Advisor (Int’l)

Office of the Chief Counsel for International Commerce
U.S. Department of Commerce
I. Introduction

The United States has consistently ranked as a top destination for foreign direct investment (FDI). The United States boasts a high Ease of Doing Business ranking, a population of over 325 million people, the world’s largest economy, and one of the best educated, most productive, and most innovative workforces in the world. The benefits of an open investment regime, based, to the extent possible, on the principle of national treatment, have been noted for decades. National treatment strives to ensure that foreign-owned companies in the United States are treated the same as domestically owned firms. This principle and its benefits were eloquently expressed in a policy statement issued by President Ronald Reagan in 1983. That policy statement emphasized further liberalization of trade, protection of intellectual property rights around the world, and the importance of national treatment as a principle. Subsequent U.S. Presidents have also emphasized the importance and benefits of the United States’ liberal and open investment regime.

Given the openness of the United States investment regime and the vast amount of FDI that the country continues to attract, it may seem unnecessary to consider the limitations foreign investors may face. Indeed, these limitations are few and far between, but foreign investors and their legal counsel need to be aware of them. This chapter describes the most important limitations by sector and does not cover, nor is it meant to cover, authorities and activities of the Committee on Foreign Investment in the United States (CFIUS). This chapter reflects the views of the author and is intended as a starting point to understanding the limitations on investing into the United States.

II. Energy

A. Atomic Energy

Commercial nuclear power and atomic energy are governed by the Atomic Energy Act of 1954. Under the Atomic Energy Act, a license issued by the United States Nuclear Regulatory Commission (NRC) is required for any person in the United States to transfer or receive in interstate commerce, manufacture, produce, transfer, use, import, or export any nuclear “utilization or production facilities” for commercial or industrial purposes. These licenses cannot be issued to “an alien or any alien corporation or other entity if the Commission knows or has reason to believe it is owned, controlled, or dominated by an alien, a foreign corporation, or a foreign government.”

Topics Covered:

- Energy Sector
- Transportation Sector
- Financial Services Sector
- Miscellaneous (Including Radiocommunications and Tech)
- State and Local Restrictions
An NRC-issued license is also required for nuclear use in medical therapy, industrial and commercial purposes, and research and development (R&D) activities.\textsuperscript{v} This second category of licenses has a restriction nearly identical to the commercial licenses previously discussed.\textsuperscript{vi} The legal limits on issuing licenses to foreign entities are implemented by 10 CFR 50.38, which provides that “Any person who is a citizen, national, or agent of a foreign country, or any corporation, or other entity which the Commission knows or has reason to believe is owned, controlled or dominated by an alien, a foreign corporation, or a foreign government, shall be ineligible to apply for and obtain a license.”

The NRC has therefore established a “foreign owned, controlled, or dominated” test (FOCD) for the purpose of determining if an investment into the United States civil nuclear sector may fall under this prohibition.\textsuperscript{vii} The NRC has issued a Final Standard Review Plan (SRP) on Foreign Ownership, Control, or Domination, which details some of the complexities that go into making an FOCD determination.\textsuperscript{viii} For example, in some situations a license can be granted where there is 100 percent indirect ownership by a foreign parent company if that foreign parent company’s stock in turn is “largely” owned by U.S. citizens.\textsuperscript{ix} On the other hand, the analysis under the “domination” principle may render an applicant ineligible for the license if its corporate structure makes a foreign company or foreign citizen appear to be dominant.\textsuperscript{x}

\textbf{B. Oil, Gas, and Certain Mineral Rights}

The limits on investment in the oil and gas sector by citizens of other countries and foreign corporations are found in the Mineral Lands Leasing Act of 1920.\textsuperscript{xii} Under that law, there are limitations on the acquisition of rights-of-way for oil or gas pipelines, or pipelines carrying products refined from oil and gas, across onshore federal lands. These restrictions also apply to acquiring leases or interests in certain minerals (including coal and oil) on onshore federal lands. Citizens of other countries and foreign corporations may have up to a 100 percent stock ownership in a domestic company that owns such rights, interests, or leases, provided that the foreign investor’s home country reciprocates with rights to U.S. companies.\textsuperscript{xii}

\textbf{III. Transportation}

\textbf{A. Land Transport}

There are two primary restrictions on investment in land transportation in the United States. The first is for transportation within the United States (cabotage), which is limited to persons of the United States using U.S.-registered and either U.S.-built, or duty-paid trucks or buses.\textsuperscript{xiii} The second restriction is cross-border bus or truck services, which require operating authority from the Department of Transportation (DOT).\textsuperscript{xiv}
B. Maritime Transport

The occasional complexity of the limitations on foreign investment into the United States is perhaps best illustrated by U.S. cargo preference laws and obligations stemming from the Military Cargo Preference Act of 1904 and the Cargo Preference Act of 1954. Military cargoes must be carried exclusively on U.S.-flag vessels. At least 50 percent of all government-generated (procured, furnished, or financed by) cargo tonnage must be carried by privately-owned U.S.-flag commercial vessels (provided those are available at fair and reasonable rates). This requirement includes agricultural cargo, but cargo generated under Export-Import Bank loan guarantees must be exclusively carried on U.S.-flag vessels (provided that the guarantee amount is over $20 million or the term of the loan is over seven years). In turn, a U.S.-flagged vessel must be owned and crewed by U.S. citizens (with certain limited exception), but the entity that owns the vessel may have a foreign parent company. Finally, it is worth noting that the cargo preference laws and regulations do not apply to non-military and non-government agency commercial goods.

There are several limitations on the transportation of goods and people within the United States (cabotage) by vessel. Cabotage of passengers is generally not allowed by foreign-flagged vessels. In order for a vessel to engage in cabotage services of goods or passengers, it must meet at least one of three essential requirements qualifying it as eligible to engage in “coastwise trade.” The coastwise trade requirements for a vessel are (1) ownership by a U.S. citizen and documentation as coastwise under U.S. law (which requires the vessel to have been built in the United States); (2) ownership by a U.S. citizen, exempt from documentation, and otherwise entitled to documentation with a coastwise endorsement but for tonnage (because vessels measuring less than five net tons are excluded from documentation altogether); or (3) ownership by a partnership or association in which at least 75 percent interest is owned by a U.S. citizen, exempt from documentation, and otherwise entitled to documentation with a coastwise endorsement but for tonnage (because vessels measuring less than five net tons are excluded from documentation altogether), citizenship of owner, or both.

The catching and transport of fish in U.S. waters is similarly limited to vessels built in the United States and either owned by a U.S. citizen or owned by an entity in which there is at least 75 percent ownership and control by U.S. citizens. Control, for the purpose of this provision, means either having the right to direct the business of the entity; possessing the
ability to limit actions of or to replace CEOs; holding a majority of the board of directors, general partners, persons serving in management capacities; or being able to direct the transfer, operation, or manning of the vessel. Control does not include certain financial rights or simply the ability to participate in the previously listed actions.

The limitations in the maritime transportation sector listed above are by no means exhaustive. The United States maintains an extensive list of reservations in its international trade agreements regarding this sector. xxiii

C. Air Transportation

Air carriers must be U.S. citizens in order to engage in domestic air service (cabotage) and to provide international air service as U.S. air carriers. xxiv Foreign Civil Aircraft, as defined by U.S. law, require authority from the Department of Transportation (DOT) in order to operate in the United States. xxv Non-U.S. citizens also require authority to engage in indirect air transportation activities such as air freight forwarding and passenger charter activities. xxvi The grant of such authority is determined by the DOT, which takes into consideration, among other things, the reciprocity granted to U.S. investors by the foreign investor's home country. Under the Aviation Programs statutes, 49 U.S.C. Subtitle VII, a U.S. citizen is defined as an individual who is a U.S. citizen; a partnership in which each member is a U.S. citizen; or a U.S. corporation where at least two thirds of the board of directors are U.S. citizens, the president and other managing officers are U.S. citizens, and at least 75 percent of voting interests are owned or controlled by U.S. citizens. A foreign company may therefore own up to a 25 percent voting interest in a U.S. air carrier or a company engaged in indirect air transportation activities without a DOT grant of authority.

IV. Financial Services

The United States has a number of restrictions on foreign investment in the financial services sector, via both mergers and acquisitions (M&A) and greenfield investment. This section provides a brief overview of some of these restrictions. At both the national level and state level, there may be citizenship requirements for banking. For example, all directors of a national bank are required to have U.S. citizenship, a requirement that the Comptroller of the Currency can waive only for a minority of the total number of directors of a given national bank. xxvii The varying requirements imposed by different states operating with different banking regulations add an additional level of complexity at the sub-federal level. Some U.S. states do not account for foreign banks in their licensing process and requirements. This may limit a foreign bank's ability to enter into that state's financial sector or create additional steps and requirements for that foreign bank to enter that state's financial sector, which are not applicable to U.S. banks. Some states also impose citizenship requirements on members of the boards of directors of state-chartered depository institutions. There are also similar requirements for insurance companies,
which are generally regulated at the state level. Various states also regulate insurance at a more local level of government, and such regulations may include citizenship requirements for their board of directors, citizenship requirements for incorporators, and residency requirements for various organizational structures.

There are also limitations on what foreign banking corporations and branches of foreign banks can do in the United States. Corporations organized under a foreign country’s laws cannot establish thrift institutions (credit unions, savings banks, or savings associations). Foreign non-bank firms cannot own Edge Act corporations, which are corporations that either take deposits from and make loans to companies doing business internationally or invest in foreign companies. This limitation does not apply to foreign banks and their U.S. subsidiaries. Foreign banks cannot engage in securities advisory and investment services without first registering as an investment adviser under the Investment Advisers Act of 1940. Foreign banks cannot be members of the Federal Reserve System (and relatedly cannot vote for directors of the Federal Reserve Bank).

Finally, there are a number of financial services activities that are limited by reciprocity conditions, and likely require an analysis of the foreign investor’s home country’s laws. These limitations include acting as a sole trustee of an indenture for a bond offering in the United States and being designated as a primary dealer in U.S. government debt securities. Similar reciprocity requirements may also exist at the state and local level.

V. Additional Limitation – Highlights (Including Technology Transfers and Radiocommunications)

There are various other limitations on investing in the United States that do not fit neatly in any of the other categories in this chapter. Many of these are not so much restrictions on investment, but rather conditions on doing business in the United States that are not applicable to U.S. investors. The largest group of such limitations is on business and export promotion services provided by the U.S. government. Foreign persons and foreign corporations cannot apply for a certificate of review under the Export Trade Company Act (ETCA) of 1982, which limits liability under federal and state antitrust laws when engaging in the certified export conduct. Foreign nationals and foreign companies can still receive the benefits of such a certificate by becoming members of a qualified applicant. U.S. International Development Finance Corporation (DFC) programs are administered preferentially for U.S. citizens or entities controlled by U.S. citizens, and their availability to foreign-owned or -controlled U.S. enterprises may depend on the extent of U.S. ownership or participation.

A key restriction for foreign investors that falls into the miscellaneous section are the regulations surrounding controlled technologies, such as lasers and sensors, nuclear materials, and chemicals. Release of a controlled technology to a foreign national in the
United States, which may be a foreign investor or part of a foreign investor, is deemed to be an export to the home country of the foreign national, and as such requires written authorization from the Bureau of Industry and Security (BIS) at the U.S. Department of Commerce (DOC). xxxvi

There are also requirements surrounding practicing before the U.S. Patent and Trademark Office. U.S. patent attorneys must be U.S. citizens or lawful residents, and U.S. patent agents must be U.S. citizens or lawful residents or registered to practice in a country that allows for U.S. patent agents to practice there (for the limited purpose of patent prosecuting applications of applicants located in another country).

Lastly, there are limitations on foreign investment in the radiocommunications sector. The United States prohibits the granting of a station license to a foreign government or representative thereof. xxxvii The United States also prohibits the granting of broadcast, common carrier, aeronautical en route, or aeronautical fixed station licenses to foreign citizens or their representatives, corporations organized under foreign laws, and corporations with more than one fifth of their capital stock being foreign owned. xxxviii There are also additional limitations on the ownership of the stock of companies that own radiocommunication company stock that are too detailed to address in this chapter. xxxix

VI. State-Level Restrictions (Primarily Real Estate)

This section addresses sub-federal restrictions on investment, which are primarily found in insurance and real estate sectors at the state level. Since the restrictions on insurance are highlighted briefly in Section IV above covering financial services, this section will focus on real estate. Some states have established restrictions on the purchase of agricultural land and may require that foreign entities comply with reporting requirements and/or establish residency in the United States. In addition, some states have limited the purchase of agricultural land by any entity (foreign or domestic) or placed restrictions on how many acres of agricultural land may be acquired by non-U.S. residents. Similarly, a few states have residency requirements for owning real estate. For example, Oklahoma allows non-U.S. citizens to own real estate only if they fall within certain exceptions (which include residency). xl Several states also have various preference systems for either U.S. citizens or residents to own land, placing limits on how long non-resident non-U.S. citizens can own real estate without changing their status to become a U.S. resident or U.S. citizen. Ultimately, there are not outright restrictions on
foreign investors owning real estate, but instead conditions and limitations at the state level.

VII. Conclusion

The previous sections have covered the sectors and subsectors where the United States has the most extensive limitations on foreign investment. While a few of these limitations are stringent in nature, many allow for high levels of indirect ownership, for investment based on corporate structure, and for investment where the home country of the foreign investor reciprocates. The volume of FDI into the United States remains the highest in the world and stands as a testament to the nation's friendly investment environment. The United States ultimately welcomes foreign investment even in the sectors where there are limitations and has made a variety of resources available to foreign investors seeking to invest into the United States, including the SelectUSA program. In that same light, this chapter will hopefully prove a useful addition to foreign investors looking to navigate the U.S. investment regime.
